

The Biotic Message CD & DVD Video

(Based upon the book, The Biotic Message, Walter ReMind, 1999)

Adventure Safaris presents a Homeschool Curriculum on Comparative Anatomy including Cells, Biology, and Genetics.

“God has made man a little lower than God.” Ps. 8:5 “All flesh is not the same flesh: but there is one flesh of men, and another flesh of beasts, and another flesh of birds, and another of fish.” 1 Corinthians 15:39.

We live in a world where there is a growing emphasis on the animal origins and nature of man. Yet the Bible always classifies mankind in relationship to God and never in relationship to the animals. The goal of this program is to help each student to see God’s Biotic Message in every aspect of life around them, from the tiniest cell to the most complicated interaction of the human body's organs and bones. Some of the questions answered will be:

- *What is the message that God has put in every living creature?
- *How can it help us understand God’s purpose for the creation?
- *Why do humans and apes have anatomies that are similar?
- *What are the two best kept secret weaknesses of evolutionism?
- *Can mutations really change an ape into a human?
- *Vestigial organs? God’s special protection for the body.
- *The Ear, the incredible hearing device.
- *What scientific concept, that is said to be the greatest argument for evolution, is actually the one that disproves it the most?
- *The Secret Life and Times of Unborn Children is a highlight of the classes and gives insight into Psalm 139:13-16. (This is Embryology that is Godly and appropriate for all ages)

Russ McGlenn has been a featured speaker at churches, Sunday Schools, and camps. Students, as well as adults, love his “hands on” visually creative programs. Biblical concepts come alive as audiences see and touch the many artifacts Mr. McGlenn has created.

WHAT YOU GET: A CD Syllabus with over 600 pages of color interactive slides for 8 lessons. This contains the class lessons, games and activities, home quizzes, models you can build, bibliography, web sites, text support e mail service, and much more. This can be your whole curriculum for the next two years.(4 modules at 8 lessons each. Module 1 is ready to ship)

This curriculum comes in 4 modules for a total of 32 lessons that can be used over a two year period. Each module has a CD of eight lessons (600 colorful slides), and two DVD videos of Mr. McGlenn teaching the lessons. All games and activities can be printed off the CD for your use. To order, send check or money order to the address below. Also, see our web site below for more on the curriculum. Click on “Curriculum 2004 to 2005.”

What parents say about Mr. McGlenn's Classes

Dear Russ,

Again, we want to say a heartfelt thanks to you for teaching God's Science by revealing to our children God's wonders thus increasing their thirst for righteousness and truth. By having the scriptures always as your guide, this also teaches our children to use God's word as a measuring stick for all subjects. We appreciate you and your dedication to revealing truth to our future generation. May God continue to bless you and give you strength.

Sincerely, with thanks,

CEFC Homeschool co-op.

Dear Mr. McGlenn, (From a thank you note at the end of the school year)

We thank God for you as you have made such an impact on our lives. You are such a faithful servant of our Lord. Your Biblical teaching of science and the wonders of our Creator are an inspiration to us. It thrills me as a homeschool mom to hear my children's science class begin and close with prayer. It indeed spurs me on to continue with homeschooling our five children. Thank you again and again for giving so much of yourself and sacrificing so many "things" to keep true to God and His word. You are truly an incredible gift that the Lord has given us an opportunity to know.

May you be richly blessed.

With Admiration,

The Lindborgs

Dear Mr. McGlenn,

I just wanted to write and say thank-you for all the years you taught me creation science. After coming to the creation seminar thing you did this past Tuesday it made me realize how much I appreciate it.

I have been unable to attend the science classes for the past few years because I've been doing Post-Secondary at a local community college. Attending here you run into a lot of evolutionists, and that is the generally held view-point. Coming to the seminar on Tuesday was very refreshing because it was the first time in a long time that I got to actually hear about creationism and the things that support it. You have no idea how much I appreciated that.

So thank-you, I miss hearing you teach and really appreciated that I had the chance. God bless you.

Sincerely,

Martha [One of Mr. McGlenn's Students]

For the first time Adventure Safaris presents the popular curriculum that has so many students and parents signing up for classes. The actual teaching will be on the DVD format. The DVDs include the class talks along with some of the activities and learning stations in action. The CDs which cover the 16 lessons include all of the power point presentation which can be followed as you watch the DVD. The CDs include games which can be printed out, vocabulary cards and quizzes. If you prefer to have us print out the games and enlarge the game boards we can do that also for an extra fee. See package descriptions for details that follow.

WHAT YOU GET:

1. A CD Syllabus with over 600 pages of color interactive slides.
2. This contains the 8 lessons, games and activities, home quizzes, models you can build, bibliography, web sites, text support e mail service, and much more.
3. Two DVD videos which include the class talks along with some of the activities and learning stations in action.
4. This can be your whole curriculum for the next two years.(4 modules at 8 lessons each. Module 1 is ready to ship. Module 2 in October)
5. DELUXE MODULE - All of the above plus a game or activity for each lesson ready made.

Games and Activities for Deluxe Modules

Module 1

1. Human skeleton game to learn basic bones.
2. Bone Flash cards
3. Animal Skull.
4. Unborn Baby Game
5. Cow bone.
6. Fish, Dissection board and tools
7. Clay Babies plaster cast 30 day and 60 days
8. Missing Blueprint Lego game
