## Dragons or Dinosaurs?

7:30 PM, July 19, 2011, **Room F2128 Totino Fine Arts Center**, Northwestern College, Roseville

What if evidence exists that man lived alongside dinosaurs? Dragon images and legends are found all over the world and in nearly every culture. They are widely considered to be mythical creatures, but what if dragons were actually dinosaurs?

The popular understanding of the dinosaur era is often used to discredit the Bible's teachings of creation, a young earth, and Noah's Flood. What if their existence instead actually helps prove the veracity of the biblical account?

*Dragons or Dinosaurs?* presents startling and verifiable evidence that humans walked with dinosaurs!

All meetings are free and open to the public, an offering will be accepted.

### Have you considered...

...the millions of dinosaur trackways found all over the world from Canada to Australia to Europe to the Americas. These trackways are dinosaur footprints that have been preserved in rock. If you travel out West, there are guide books full of where you can go 4-wheeling to find hundreds of tracks. Purgoire Valley in south-eastern Colorado has 1,300 tracks. Just outside Denver is Dinosaur Ridge with some 350 dinosaur tracks. St. George, Utah has among the dinosaur trackways, tail drags and one place where the dinosaur actually sat in the mud. Paluxy River near Glen Rose Texas contains numerous large dinosaur foot prints, some so large a young child can sit in it. These trackways almost always run in a straight line, as if fleeing in one direction, not meandering around. The tracks are found only on flat bedding planes. Today, we find animal tracks wandering up hills and down into valleys.

In the Rocky Mountains and high plains of North America, dinosaur tracks are found on top of thousands of feet of sedimentary rock that had been laid down by the Flood. Dinosaurs fled rising flood waters, leaving their tracks. The tracks were subsequently covered with hundreds of feet of sediment. These sediments were later eroded down to the level where the tracks were revealed. Today our footprints on a beach are quickly obliterated. To preserve dinosaur tracks would require rapid burial. To have footprints preserved worldwide, would require a worldwide event such as the Genesis Flood.

**BELIEVE IT!**

**TCCSA's STATEMENT OF BELIEF**

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
