

## The Age of the Universe

**Tuesday, February 19, 7:30**, Northwestern College, Totino Fine Arts Building Rm F2128, 3003 N Snelling, Roseville

A straightforward reading of Scripture clearly teaches six-day creation with an age of thousands of years. Does science teach billions of years? Don't billions of light-years require billions of years to travel? What is light anyway? How did conventional science arrive at the Big Bang? What assumptions were made along the way? What would happen if we rethought some fundamental notions in physics? Do Creationists offer alternatives? Do they agree with each other? Can the Genesis account of creation actually offer insight into fundamental physics? This presentation delves into all of these questions and offers real answers to some very tough questions. It will confirm that Scripture is trustworthy, God is in control, and His creation is even more awesome than we've ever imagined.

Greg Volk is president and proceedings editor for the Natural Philosophy Alliance (NPA), an organization dedicated to free and unbiased inquiry in fundamental questions of science. He is also co-founder and editor of the World Science Database, a web-based resource cataloging the work of several thousand independent scientists worldwide.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered...

...evidence for the Genesis Flood. One such evidence is the world-wide phenomena of folded rocks. Geologists find entire strata sequences folded without fracturing. This is only possible when the sedimentary layers are still soft and pliable like modeling clay, when they were folded. In the same manner, if modeling clay dries out it becomes hard and brittle, unable to bend without breaking or shattering. Many of these folded rock sequences show no sign of breaking or shattering.

When geologists examine many of these folded rocks, they find no evidence of high temperature; these rocks were bent at normal temperatures. These folded sedimentary rocks were still sedimentary rocks! This can only mean that these folded rocks were still soft and pliable when folded. During the Genesis Flood there would have been rapid movements of the plates on the Earth's crust. No sooner would the floodwater have laid down great quantities of sand and mud than moving plates would have crumpled the sediment while still pliable, resulting in folded rocks. The Genesis flood would have been a powerfully destructive event leaving evidence of folded rock strata around the world.

...stop and consider God's wonders. Job 37:14

### The Science Fair, Saturday, February 9, 2013

In past years we have had our fair at Har Mar Mall but due to the costs required by the mall we are moving to Northwestern College. Students should be researching projects of interest and planning how to make it work. Early planning should greatly improve the results and increase their chance of winning a prize. Encourage your students to start now. Rules and helps are at [www.tccsa.tc/fair/index](http://www.tccsa.tc/fair/index). The skills developed here will benefit them in school and jobs.

### Coming Up . . .

Mar. 19—Bruce Malone, Mysteries Written in Rocks  
Apr. 16—Dr. Paul Maier, Early Church View of Creation  
May 21—Dr. Charles (Bill) Lucas, Common Sense Science  
Jun. 18—Brian Young

Check for updates at [www.tccsa.tc](http://www.tccsa.tc)

If we haven't heard from you for several years, we may remove your name from our list. Please let us know if you want to remain on our newsletter list.

## Adventure Safaris

By Daniel Nuckols

*There is a great opportunity to be salt and light in government schools...*

This newsletter is also available  
as an email? You receive your  
newsletter where you are, and a  
reminder a couple days before  
the meeting. If anything changes  
or we hear about a new activity,  
we put it in the reminder. Let us  
know if you would like to be  
included on our email list. We  
won't share your information  
with anyone.

### Moving?

Let us know so you won't miss out! The Post Office  
returns newsletters so we can update your address,  
but they charge us postage for each return. You can  
convert to email so it goes where you go. Thanks  
david-johnson@usfamily.net

## 2012 Annual Report to Members and friends of TCCSA

We want to thank you for your support this past year. It was a good year with excellent programs and an average attendance of 94 per month. We enjoyed speakers from England, CA, AZ, CO, NE & MN.

If you have an idea for a program and/or speaker you want to hear, let us know. We want to serve you with programs that will enable you to share with others the good news of the Creator's handiwork.

Memberships & offerings totaled \$5,301.60 and we spent \$5,023.02 for the year. All income is used to provide speakers and advertise our programs. Many incidental expenses such as supplies, meals, lodging and transportation are donated. We had 51 paid members last year and so far this year we have 25. If you mail in your membership, please stop at the book table and claim your DVD as our gift for joining.

We look forward to another year of good speakers and good fellowship as we study the things our Creator has provided for us.

The TCCSA Board of Directors
