

CREATION BULLETIN

March 2013

Vol. 39, No. 3

Mysteries Written in Rock

Tuesday, March 19, 7:30, Northwestern College, Nazareth Chapel, 3003 N Snelling, Roseville

It was the denial of a real, world-restructuring, Biblical-scale, global flood - and the addition of enormous periods of time to the geological record of our planet - which directly led to the widespread acceptance of Darwinian evolution. Yet in recent years geologists are acknowledging that many, if not most, of the sedimentary layers of rock upon the Earth must have formed quite rapidly and catastrophically. So where is all the time needed for evolution to have occurred? Supposedly between the layers of sediment. Bruce Malone uses visual images, demonstrations, and video clips to explain in easy to understand, non-technical terms the mechanisms which formed the rock layers during the flood and how we can know that there is no "missing time" between the rock layers. Bring the whole family for this one.

All Meetings are free and open to the public, an offering will be accepted.

Take a walk through the many links at www.tccsa.tc.

You will find;

- ◆ Articles on many topics from many writers
- ◆ List of teachers and speakers in our area
- ◆ Science Fair and Writing Contest information.
- ◆ Creation organizations around the state, country and world
- ◆ Activities in the metro area and beyond
- ◆ Past and future TCCSA programs
- ◆ Summer camps and activities around the country
- ◆ History of TCCSA (2013 is our 40th year)
- ◆ Cartoons

If we haven't heard from you for several years, we may remove your name from our mailing list. Please let us know if you want to remain on our newsletter list. There is a letter and a number following your name on the address label. The number is the year we last heard from you. R05 = 2005, M10 = 2010

Writing Contest

All Students K-12 who can write are encouraged to participate in our writing contest. Rules can be found at tccsa.tc/archives/contest/index.html. Our goal is to help your students become the next generation of writers from a Christian perspective. We want future writers to be grounded in what the Bible actually says. Without a background in what God tells us in His Word they won't be able to tell fact from fiction. Another writing contest is available at <http://midwestcreationfellowship.org/pages/misc/index.php>

Bruce Malone and others will be leading a seminar on Saturday March 16. Starting at 8:15 AM and running until 3:30 PM with classes and activities for the whole family. You may want to make this a priority. Information at www.stlucasc.org. St. Lucas Community Church, 1195 Manning Ave. N, Lake Elmo, MN 55042. Early registration discount. Questions: scvcial@juno.com

Coming Up . . .

Apl. 16—Dr. Paul Maier, Early Church View of Creation
May 21—Dr. Charles (Bill) Lucas, Common Sense Science
Jun. 18—Brian Young

CREATIONWISE

Have you considered...

...the origin of caves. Most caves are limestone caves. They are usually found in nearly pure limestone layers hundreds of feet thick. There are two stages of cave formation: 1. the cave itself, 2. the decorating of the caves (stalactites, stalagmites...). The Flood of Noah's day would have laid down these nearly pure layers of limestone. At the end of the Flood, "the mountains rose, the valleys sank (tectonic activities) Psalm 104:8. These tectonic activities would have caused many cracks in the limestone which would have allowed water to drain through them. This were no ordinary water but water rich in acid which would have quickly eaten away limestone. Where did the acids come from? The tectonic activities would have released sulfuric acid and/or the decaying dead animals and vegetation (that were killed by the Flood) could have been a source for acid which would quickly eat away limestone forming the cave tunnels.

Now stage two: decorating the caves, decorations were formed by water loaded with limestone. Just after the Flood, the ground would have been much wetter, due to the Flood water and the post-Flood Ice Age. Limestone rich water dripped from the cave ceiling and evaporated, leaving behind a variety of cave decorations. Since that time, the water supply has decreased, so the growth of cave decorations has slowed. When we put on our Biblical glasses, we can see where cave formation and decoration fit in. Limestone cave formations commenced with the Flood of Noah's day some 4,300 years ago...

...stop and consider God's wonders. Job 37:14

Exploring Geology with Mr. Hibb, Michael J. Oard, Tara Wolfe & Chris Turbuck, p.61-63

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Help !

We sometimes have requests for rides from people who are unable to drive. Currently someone in Hopkins is looking for a ride to our meetings. Let us know if you can help. Use email below.
