

## Global Warming - A Christian Perspective

Tuesday, November 19, 7:30, Totino Fine Arts Center, Rm F2128, Univ. of Northwestern, 3003 N Snelling, Roseville

- Learn how secular worldviews may be standing in the way of good science
- Is global warming really a bad thing?
- Could more carbon dioxide be helpful?
- What are the social implications of global carbon reduction legislation?

Bob Bonahoom graduated in analytical chemistry from Michigan State University and has been professionally involved in the fields of science and engineering for 42 years. In 2012, Bob retired from MSA where he held the position of Director of Advanced Technology and Intellectual Property. MSA is a leading manufacturer of safety equipment and electronic instrumentation. Bob has been studying and lecturing on creation vs. evolution and the global -flood for 15 years and he has recently added a new lecture on Global Warming. He and his wife Eileen reside near Minneapolis, Minnesota; they have 5 children and 7 grandchildren.

All meetings are free and open to the public, a free-will offering will be accepted.

### Church Point People Wanted

We would like to have someone in each church who can promote biblical creation to your congregation.

1. Have a desire to promote creation science
2. You are a Christian
3. Do not have to be a leader
4. Need only a basic understanding, not be an expert
5. Have a desire to learn more about creation science

If you are interested in becoming involved let us know so we can provide more information.

### More Free Stuff on the Web For Kids

Did you know you can get free creation stuff?

- ◆ [www.creationism.org/for\\_kids](http://www.creationism.org/for_kids)
- ◆ [www.biblestoryprintables.com](http://www.biblestoryprintables.com)
- ◆ [www.ministry-to-children.com/creation-bible-lessons](http://www.ministry-to-children.com/creation-bible-lessons)

### Coming Up . . .

Dec—no meeting or newsletter

Jan. 21—Dr. Clyde Billington, In Search of the Lost Temple Menorah

Feb. 18—Shyla Allard, Teaching Children the Biblical View of Dinosaurs

### Looking Ahead

TCCSA wants to encourage students to go deeper in science and offer two competitions to help you.

We are planning another Science Fair for February, stay tuned for date and location. You can start planning, constructing and completing a project now.

<http://tccsa.tc/fair/index.html>

We have a writing contest with May 15 the deadline to turn in your writing project.

<http://tccsa.tc/archives/contest/index.html>

We offer prizes for the above activities but for some real cash go to <http://midwestcreationfellowship.org/pages/essay/essay-annual.php>. There will be more competition but the rewards will also be greater. You are welcome to enter any or all of these competitions.

### Program DVD's

Have you wished you had a copy of a TCCSA program that you missed or want to share? Most of our programs have been recorded and are available from Lehrke Productions. They may be purchased at our meetings or from [LLL@mntelelevision.com](mailto:LLL@mntelelevision.com).

**Monkey's Cuz** by Daniel Nuckols

**Have you considered...**

...coal. We have trillions of tons of coal worldwide. Today's vegetation would give us only 3% of earth's coal deposits. So were did all the plant material come from to produce the vast quantities of coal? First the old assumption that it take 10 ft of peat to compact into 1 ft. of coal has changed, we now know 10 ft compacts to make 5-10 ft. of coal. Next the pre-flood land was 100 % covered with vegetation. Finally the pre-flood world would have had vast mats of floating forests that grew along the coastlines. All this would have had the world 75% covered with plants. Little compaction, large land areas covered with vegetation, floating forests all made Noah's world very lush.

Experiments have found that changing plants to coal took only a few months when heated with clay minerals. Clay minerals often make up 80% of the non-plant material in coal (clinkers). The huge coal deposits we see today can be explained easily by the Flood. Vast quantities of vegetation ripped up combined with clay swirling in the flood waters produced the vast coal deposits we find today. God destroyed the pre-flood world yet He shows mercy to us through the making of our fossil fuels.

...stop and consider God's wonders. Job 37:14

*"How did we get all this Coal?"*, Andrew Snelling, Answers magazine, April-June 2013, p. 70-73.

**TCCSA's STATEMENT OF BELIEF**

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

**Moving?**

Let us know so you won't miss out! The Post Office returns newsletters so we can update your address, but they charge us postage for each return. You can convert to email so it goes where you go. Thanks! david-johnson@usfamily.net
