

## From Darwin to Dictatorship

Tuesday July 16, 2024, 7:00 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

This hard-hitting presentation is born from Dr. Kezele's personal experiences in Eastern Europe and opens with the "Laying the Foundation" for evolution that Ernst Haeckel laid down in Germany and in Europe as a whole. It then reviews how this foundation was used to promote racism and how the Nazis took advantage of that foundation. The scene then shifts to Soviet Russia after "Revolution of Foundation" and a recounting of some of the terrible events that occurred there in an evolutionary based political system. The last sections are "Evolution of Foundation" in America and "The Consequences". They show why we now have to deal with racism, abortion, euthanasia, embryonic stem cells, and rationing of health care.

Dr. Joseph Kezele, MD comes to us from Arizona where he is an active member and presenter of the Arizona Origin Science Assoc. He speaks on many topics and this one should be a good one.

Updates at [www.tccsa.tc](http://www.tccsa.tc) All meetings free and open to the public.

### Have you considered ...

...the feather of an owl. It is not like the other birds' feathers which have edges that are straight and crisp. An owl's flight feather has fringes on it. It is also different in that it has a notch on one of its flight feathers. Both the notch and the fringes provide the owl with a noiseless flight. In fact, an owl is one of nature's stealthiest hunters. Its prey is often unaware until it's too late. Question: What do computers and owls have in common? Computers need fans to keep them cool, yet fans are noisy. What to do? That was the question posed to a group of computer engineers. One evening one of those engineers noticed an owl flying. He saw it but, could not hear it! The owl was noiseless. Ah Ha! Copy the owl feather! And so, quiet computers were created.

" But ask the animals, and they will teach you, or the birds of the air..." Job 12:7
