

Latest Findings Regarding The Coconino Formation

Tuesday September 17, 2024, 7:00 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

The Coconino Sandstone has been a battleground in the war of naturalism and creationism. Naturalists claim it took 5 to 10 million years for the Coconino sand to be deposited. That is used as an argument against Noah's Flood. The latest research shows that the Coconino was deposited rapidly in water. You'll hear and see all the research.

Guy Forsythe made a discovery in the Coconino Formation in Sedona which resulted in a paper being published by Guy, John Whitmore and Paul Garner in 2015. He will be coming to us via Zoom on the big screen and will be available to for questions following his talk.

All meetings free and open to the public.

Have you considered ...

...fossilized ripple marks.

This very common fossil is found worldwide especially in sandstone formations. Fossilized ripple marks are identical to today's ripple marks. Ripples are formed as water moves over sand. There are two types of ripple marks, those found along beaches and those found on ocean bottoms formed from strong currents. Ripple marks are made in wet sand. They can easily be wiped away, just like a sandcastle on a beach is gone in a few days. To have ripple marks preserved requires rapid coverage and a cementing agent such as calcium carbonate, silica, or iron. We do not see ripple marks becoming fossils today.

What event in history has water world-wide and rocks being ground up into sand with cementing agents? The Flood of Noah's day.

This very common world-wide fossil has been frozen in time to give testimony to this catastrophic Biblical event.

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

To help us continue to provide excellent speakers would you consider presenting the enclosed request to your Pastor or Church leader? Our costs continue to increase especially for speaker travel expenses. Expenses often are 2 or 3 times the amount received in our offerings. Zoom meetings and local speakers help us reduce costs but in-person meetings attract larger turnouts.

Twin Cities Creation Science Association (TCCSA) is a local non-profit, volunteer-run organization dedicated to spreading the fact that scientific evidence points to creation and the accuracy of the Biblical timeline. Genesis is very clear on when and how God created all that exists.

TCCSA has local meetings 11 or more times per year. We don't stop there, programs are live-streamed to the whole world via YouTube and remain online to be watched by people in many countries. Places include countries where Christianity is not allowed.

The University of Northwestern in Roseville provides a meeting place without charge but there are other expenses. We pay speaker's travel expenses and a small honorarium. We also need good equipment to make it all happen. We invite you and your church people to attend our meetings in person or online. We are looking for churches to help support us as a mission to the whole world. They can find out more at www.tccsa.tc or david-johnson@usfamily.net

CREATIONWISE

We're on Facebook www.facebook.com/pages/TCCSA/110571272303973?ref=ts
TCCSA is on Instagram: @tccsa_tc and on Twitter: @TCCSA_TC. TCCSA programs are on YouTube & Rumble—links at www.tccsa.tc. DVDs are also available

The Twin Cities Creation Science Association (TCCSA) is an organization dedicated to spreading the word that scientific evidence points unequivocally to creation and the accuracy of the Biblical timetable. This is contrary to not only the common secular view, but contrary to the assumptions of many Christians that evolution and millions of years has been proven and we must find a way to live with that as Christians. I once believed that way and was astounded by the actual evidence! When it is understood that the geologic record is actually strong evidence for a worldwide flood, the millions of years melt away. Moving water lays down sequential strata as demonstrated at Mount St Helens and quantitative studies can estimate the depth of water and current velocity that laid down the formations seen in the Grand Canyon. It is also clear that there would not be billions of fossils in the rocks if they had been laid down over long ages – the fossilized creatures would have long ago decayed! Recently intact blood cells and blood vessels have been found in fossils dated by secular authorities as hundreds of millions of years old. This is obviously impossible, but the promoters of evolution torture the evidence in an attempt to make it fit their conclusions instead of allowing the data to speak for itself. Indeed, the rocks cry out! The Biblical record claims that death entered the world as a result of sin. If millions of years elapsed before Adam and Eve sinned, then the Bible is discredited. But in reality, the evidence strongly supports the Biblical history. Despite these facts, many Christians and non-Christians believe the myth of evolution and deep time.

Twin Cities Creation Science is a Christian non-profit organization, for which contributions are tax deductible. It produces a monthly program held currently at University of Northwestern St Paul (located in Roseville) and maintains a website and has a variety of recorded programs on its YouTube channel. The website, www.tccsa.tc has information on the programs and the resources available. This website has a worldwide reach with visits coming from eastern Europe, including both Ukraine and Russia as well as Asia, including China and India. The TCCSA YouTube channel has records of previous meetings, some with thousands of views. This is also available on Rumble.

Many youth have attended the meetings of TCCSA and many have had contact with the evidence for creation through the Creation Museum and Ark Encounter in Kentucky.

TCCSA is a low-budget all-volunteer organization dependent on contributions and could benefit greatly if churches could put it on their missions budget.

TCCSA STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit.
