July 8 2014 update

Adventure Safaris and Russ & Tricia McGlenn present for the 2014-15 School Year

Science Track- Wonders of God's Creation

Natural History - God has a purpose for everything He created whether its mosquitoes, oil, or a T Rex. These lessons show God's plan and handiwork as seen in his Creation. When many leaders in our country emphasize serving the creation rather than the creator, (Romans 1:20-23) we need to teach our students to take "dominion" over the creation and to practice good conservation of our resources. We are to be good stewards of the Earth but not place it over the welfare of humanity. Our goal is to show God's handiwork and sovereignty as seen in His creation.

History Track- Inventors Workshop

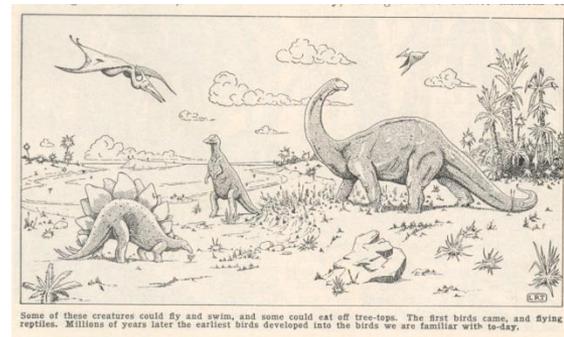

The Inventor's Workshop has been very popular in the past. Perhaps you have a student who's strengths are not in the area of language and phonics etc. Their strengths are in building and inventing. This class can encourage them in their gifts. It can be a self-esteem builder. Please e mail us today if you would like your student to come.

Here is what a homeschooling Mom said about Russ McGlenn's classes. "There will be lots of hands-on activity time in this very interesting class about Inventor's. The students will learn about famous inventions and Inventors, and do great activities such as: Making their own Vacuum! (if only they would use it!!), Electricity and Toys of the Past, Inventions by Women, Gears and a Waterwheel, Inventors who followed Christ, Steps to making your own invention and Chinese Inventors. Don't miss this one!

One day Adventure Safaris - Tired of "Evolution and Millions of years" lectures on field trips? Try our field trips that glorify God.

Como Zoo - Seeing God's Handiwork in Animals. Sat. Sept 20 from 10am – 2pm a 30 pg colorful handbook is included. The cost for families is \$28; singles \$15. We will meet by the Merry-Go Round (originally from the fairgrounds). Please notify your leader or contact

Russ & Tricia McGlenn 805 588 3353: Text or Email russmcglenn@juno.com Web www.adventuresafaris.org

Some of these creatures could fly and swim, and some could eat off tree-tops. The first birds came, and flying reptiles. Millions of years later the earliest birds developed into the birds we are familiar with to-day.

Dear Friends,

Here are some activity highlights that go along with the lessons described in the attached outline. We use colorful vocabulary cards to help students learn the truths about God's creation. Below are examples of three games out of eight that will be used.

The "Energy Oil Game" helps students separate myth from fact about our energy use in the USA. It will help them get a Biblical View of God's concern for energy that we use today.

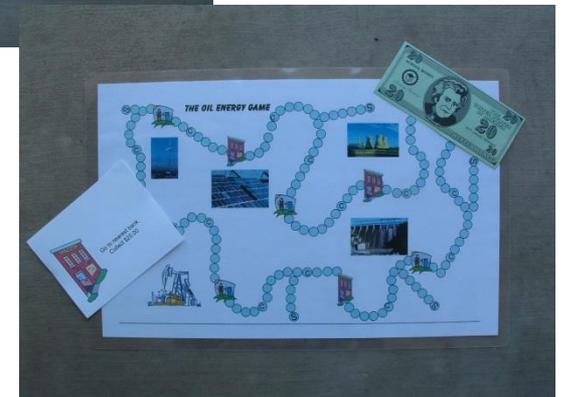

The "Carbon 14 (C14) Dating" game shows the 7 problems (Assumptions) that make this dating system unreliable. Carbon 14 is a difficult topic to understand at times. Russ has broken it down to an understandable level. The game "Carbon 14" provides various scenarios where carbon 14 dating would be used and the problems with it

All "missing links" (there are none RM) are dated by C14 and get up to 50,000 years old. When students see the faults in this dating system, they will see that the Biblical date for creation of 6000 years ago is correct and can be shown by science to be the true. True science always agrees with God's Word as He is the author of both.

The "Dragon Graveyards and Basins Game" shows students huge dinosaur & mammal graveyards left over from Noah's Flood. Sedimentary (mud turned to sandstone) Basins that are 3 miles deep and cover whole states cannot be accounted for by local flooding. These are all evidences for a catastrophic world wide flood. The students get the Big Picture from this lesson and a Biblical world view of the Flood. A large color game board is used to get the message to the students.

Students and parents love these classes as they see the Glory of God's Handiwork.

Adventure Safaris Home School Classes for 2014-15

Russ and Tricia McGlenn

Natural History - Whether its mosquitoes, oil, or a T Rex, God has a purpose for everything He created. These lessons for the 2014 - 2015 school year will show God's plan and handiwork as seen in his Creation. When many leaders* in our country emphasize serving the creation rather than the creator, (Romans 1:20-23) we need to teach our students to take "dominion" over the creation and to practice good conservation of our resources. We are to be good stewards of the Earth, but not place it over the welfare of humanity. Our goal is to show God's handiwork and sovereignty as seen in His creation.

Day 1

Lesson 1 Oil - God's gift to Humankind. Are we running out of Energy in general and oil in particular? Does God care and does He have a plan?

L.2&3 Carbon 14 Dating Game. How old is the Earth? Does science support a young age for the Earth?

L.4 Dragon Graveyards Survey. Dinosaur burials tell us about the age of the Earth and God's Judgment and Mercy

Day 2

L.5 Dragon Graveyards close up. Close up of a dinosaur dig, what we find and it's relationship to the Bible.

L.6 Giant Rock Safari. The largest free standing rock in the world testifies to a global catastrophe.

L.7 Devil's Tower. Monument to Noah's Flood.

L.8 Did T Rex Have Feathers? Scientific evidence that ruffles the theory that dinosaurs evolved into birds. A comparison of the data pro and con. [Mt St Helens]

Day 3

L.9&10 Red Shift. Shifty red light shows that the universe is young.

L.11&12 Po 218 Halos - Evidence that the Creation of the Earth's granite crust took less than 3 minutes.

Day 4

L.13 Fibonacci Number in Plants. Geometric design shows God's handiwork

L.14 Plant Grafting and the root of Jesse. How grafting illustrates a Biblical truth.

L.15 Insects that Show God's Handiwork. A survey of several insect's design and activities that show they were intelligently designed.

L.16 Butterflies and Resurrection. The incredible death and resurrection of the Monarch butterfly.
