

Did God Really Create Man?

By Emily Hannan

Age 9

Then God said, "Let us make man in Our image, according to Our likeness; and let them rule over the fish of the sea and over the birds of the sky and over the cattle and over all the earth and over every creeping thing that creeps on the earth. And God created man in His own image, in the image of God He created him; male and female He created them. And God blessed them; and God said to them, "Be fruitful and multiply and fill the earth..."
Genesis 1:26-28a

Over the years evolutionists have used bones which they had found to try to prove their theory of evolution but were later found incorrect, such as the Piltdown Hoax, Lucy, and many others.

Here are just two examples of many bones that prove the creation of man rather than the evolution of man.

1. In June 1973 Homo Habilis known as 1470 Man was reported in the *National Geographic*.

1470 Man was found under volcanic ash and was dated to be 2.6 million years old. This skull was definitely human. An evolutionist, Richard Leakey, wrote in bold letters, "**Either we throw out this skull or we throw out our theories of early man.**"

This was a shaking discovery, but this is only one of many.

2. In 1974 a clearly ape-like skeleton named "Lucy" was found and claimed to be three million years old and also to have walked upright. How could evolutionists be sure that this one walked upright?

The man who found this skeleton was questioned about this in public, "How do you know that this ape walked upright?" His answer; "The knee joint that this ape has is the same as a human's. Next question, "Where was this joint found?" His answer; "A mile and a half away from the rest of the skeletal fragments in rock strata two hundred feet deeper."

Next question, "Why include a fossil fragment so widely separated from the main find?" The man insisted, "anatomical similarity", was all the justification needed. (Unlocking the Mysteries of Creation pg 129)

This bone was used as a key to evolution. Later they discovered a locking feature in Lucy's wrist that proved she walked on all fours. We humans do not have that feature.

Another interesting fact is that all the bones that look like apes in the process of evolving into humans cannot even fill a single casket. More than that small amount of ape-men would have died if evolution happened. Where are all the evolving bones? Evolution did not happen, because scientists cannot find any bones that are clearly apes evolving into humans. More importantly, the Bible is clear that man was created in the image of God on the sixth day of creation.

There was morning and evening the sixth day. Thus the heavens and the earth were completed, and all their hosts. Genesis 1:31b-2:1
