The Human Visual System

Tuesday, Nov. 18, 1997, 7:30 p.m. Totino Fine Arts Center, Rm. 115 Northwestern College, Roseville

The human eye is so highly specialized that Charles Darwin mused whether his theory was not preposterous in light of the eye's complexity. Darwin should have listened to his instincts, because scientific discoveries in the last 130 years have shown that the human visual system is so complex it is absurd to attribute its development to random natural processes. This discussion will cover several of the fascinating design features of the visual system, including microscopic and gross anatomy, chemical reactions within the eye, an example of ocular motility, and the critical interaction between visual, memory and motor centers of the brain. The inescapable conclusion will be that we are fearfully and wonderfully made.

Randy Guliuzza, M.D., P.E., is currently a flight surgeon at Ellsworth Air Force Base, South Dakota. He is a graduate of the University of Minnesota (medicine) and the South Dakota School of Mines & Technology (engineering), and is a licensed professional engineer.

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
Upcoming Metropolitan Creation Science Association Events

The Metropolitan Creation Science Association holds its meetings at Redeemer Lutheran Church, 1301 E. Cty. Rd. 42, Burnsville, the first non-holiday Monday of each month starting at 7:30 p.m. Call (612)461-1073 for info.

November 3 - John Nuckols, Out of Place Artifacts
December 1 - Bill Overn, Star of Bethlehem

Notice: Have you renewed your subscription to the Creation Bulletin? Check the date after your name on the address label. If it says 97 it’s time to fill out the form on the other side. Also if you are planning to move please let us know so you won’t miss an issue and we won’t be charged return postage. Thanks
