Modern science rests upon the foundation of Quantum Theory and the two Theories of Relativity. These very successful theories are widely taught in the Physics Departments of nearly every college and university around the world. Dissatisfaction with the present day foundations of modern science and current models of atoms by a growing number of scientists has resulted in research which has produced better models of atoms and molecules. Efforts of some of these researchers has been combined in the organization Common Sense Science, a non-profit organization performing scientific research and developing molecular models based on physical reality.

David L. Bergman, president of Common Sense Science, is a scientist and electronic systems engineer with more than 30 years experience in research, development and test of electronic systems. He is officially retired but active in completing and presenting physical models and a theory of matter based on the Judeo-Christian worldview.

In his lecture, Mr. Bergman will present the ideas of atoms from early thinkers such as Epicurus and Aristotle and then compare them with concepts that form the basis for modern science. He will then show the fundamental concepts that provide the foundation of the Common Sense Science models and theories of matter. A time for questions will follow the lecture. Additional information may be found on the internet at www.cormedia.com/css

Case for Creation Seminar
Dr. Duane Gish & Prof. Frank Sherwin will be at the Golden Valley Lutheran Church on May 14, 7:00-9:30 PM and May 15, 9:00-11:30 AM & 12:30-3:00 PM.  
Topics: War of the Worldviews, Evolution is against the Law, Shifting Sands of Evolutionary Thinking, Design in Nature, Evolution: the Fossils Still Say No!, and Winning the War of the Worldviews.  The church is located at 100 Turners Crossroad South at Glenwood Ave.  Registration will be $10 / person, $20 / family or $5 for seniors and full-time students.  For information call (612) 519-0918.

TCCSA Logo Contest
Do you have a better idea? Think you can design a logo for TCCSA that will catch the eye and tell our story? We think it’s time to change our image, will you help? Keep it simple so it will be recognizable large or small.

WHY DO WE NEED A NEW OR MODIFIED LOGO?
The central part of the present logo, the world and the Bible with the words Creation Science, are OK, but the outer portion of orbit paths which make the whole logo an approximation to a Bohr atom model, are not in agreement with current scientific evidence for atomic structure. Contest winner will receive recognition and a free membership. Get your creative juices flowing and your TCCSA Logo.

CREATION WISE

ADVENTURE SAFARIS

Three 5-day Dinosaur and Indian camps are scheduled for May at Devils Lake State Park, just thirty minutes from the Wisconsin Dells recreation area. Russ, his daughter, and son-in-law will draw from their Native American background to help you experience how Indians lived and what the Bible has to say about their origin and future. You will also learn about evidence of early Indian contact with dinosaurs.

We are also running four, 5-day camps in June and July at a sauropod (long neck dinosaur) site near Belle Fourche, SD, an hour drive from Rapid City. Camp sites, motels and even a bed & breakfast are available in the area. In addition to digging, there are many free-time activities for the whole family. A training manual will be provided prior to the digs so you can develop dig skills at home before you go.

Sailing trip on Lake Manitoba in Canada, August 8-21 in search of Monopogo. Monopogo is a supposedly extinct basilosaurus dinosaur that has been sited for the past 40-50 years usually in August. We will be sailing, exploring, hearing legends and much more. There are discounts for registration before April 15. Contact us for more information or to reserve your place at one of these unforgettable family camps. You will be glad you did!
