Dinosaur Soft Tissue

7:30 PM, November 16, 2010, Totino Fine Arts Center Room F2128, Northwestern College, Roseville

Mary Schweitzer and others have shocked the scientific community with their discovery of intact soft tissues (cells and flexible blood vessels) and preserved organic molecules inside bones from Tyrannosaurus Rex and Hydrosaur specimens. Others have discovered preserved muscle tissue in fossils and coprolites and have reported "bad odor" when digging up dinosaur remains. These discoveries contradict current beliefs of the scientific community and have created a controversy - can soft tissue remain intact much longer than expected, or are these specimens not as old as expected? We will explore the evidence and its implications.

Dr. Robert Stadler is a senior principal scientist at Medtronic with a doctorate in Medical Engineering. He holds 29 patents with about 30 more pending. This talk will provide you with the facts on what is being found and how evolutionists explain it.

All meetings are free and open to the public, an offering will be accepted.

Other activities in our area!

Nov. 19-20: Science & Bible W/Bruce Malone, Ross Olson, Don Slinger, Dan Nuckols and Charles Morris. St. Lucas Community Church, Lake Elmo.

www.stlucascc.org—discount for early registration.

Check www.tccsa.tc for activities in our area.

Coming Up . . .

December: no program, no newsletter

Jan. 18—Dr. Clyde Billington, New discoveries in Old Testament Archeology

Feb. 15—Dr. Charles Aling, The Joseph Story, new evidence

Mar. 15—Dr. Randy Guliuzza

For updates go to www.tccsa.tc

Each February, TCCSA sponsors a science fair open to K-12 students. This is an excellent learning experience for everyone involved. Students plan, design and construct their project, record their results, construct a poster and write a report. The final step is to present their project to judges and the public in a clear and concise way. A former participant is now an engineer who constantly uses what he learned in his occupation. Go to www.tccsa.tc and click on Science Fair for dates, rules and ideas. You will be glad you did.

Have you considered...

...your knee with its ACL? You're watching a football game and a player goes down. He's holding his knee and seems to be in excruciating pain. What's happening with his knee? He has probably torn one of the ligaments, in particular the ACL, anterior cruciate ligament. Did you notice the name of this ligament? It has the word cruciate in it. The word cruciate comes from the word cross. And indeed, the two ligaments at the knee joint form a cross; the ACL (anterior cruciate ligament) crosses over the PCL (posterior cruciate ligament). When the ACL is torn, it causes excruciating pain. So here in the midst of a football game, the message of Jesus' crucifixion can be told—his excruciating death on a cross for our sins. We are called to use every opportunity to proclaim His message. Who would have thought it could happen at a football game with a torn ACL?

...stop and consider God's wonders. Job 37:14

Monkey's Cuz by Daniel Nuckols

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Want interesting inserts for your church bulletins or for handouts? Creation Moments provides free downloads on their web site, www.creationmoments.org, click on Resources and then Church Bulletins. Lots of good stuff there.
