

CREATION BULLETIN

February 2011

Vol. 37, No. 2

The Joseph Story, New Evidence

7:30 PM, February 15, 2010, Nazareth Hall Chapel, Northwestern College, Roseville

This talk will center around the question of Joseph's titles, particularly that of Vizier. Was he one? What does the latest research show us about this question? If he was, what did a Vizier in the Middle Kingdom period of Egyptian history do? Also, could Syro-Palestinians hold high office in Egypt?

Dr. Charles Aling is the History Department Chair at Northwestern College. He has worked on excavations in Egypt, including the excavation of a royal tomb in the Valley of the Kings. His knowledge, experience and speaking style will be sure to keep your attention and capture your interest.

Please note the location this month is the Chapel in Nazareth Hall.

All meetings are free and open to the public, an offering will be accepted.

Science Fair and Writing Contest

TCCSA sponsors a science fair, open to all K-12 students on February 12-13. This is an excellent learning experience. Students plan, design and construct their project, record their results, construct a poster/display and write a report. The final step is to present their project to judges and the public in a clear and concise way. A former participant, now an engineer, says he uses what he learned to think logically and communicate clearly. Go to www.tccsa.tc and click on Science Fair for rules and ideas. Prizes for the winners in each age group. Judging Sat. morning, display through Sunday. Also check out our writing contest. You may use your science fair project as a topic if you wish. Papers are due May 15. Winners may be asked to read their paper at a TCCSA meeting. Click on Writing Contest.

Coming Up . . .

February 12-13—Science Fair at Har Mar Mall
March 15—Dr. Randy Guliuzza, Programmed Filling: NOT Natural Selection
April 19—Russ McGlenn, The Magnificent Monster of Manitoba
May 17—Tom DeRosa
For updates go to www.tccsa.tc

Have you considered...

...the importance of ice floating. Imagine a lake filled with fish, plants and other creatures. In the winter, ice forms on top of the lake. What if the ice sank to the bottom? Then another layer of ice formed on top and this too sank to the bottom. Eventually the lake would fill with ice, killing all the creatures living in it. Imagine how long it would take for the summer sun to melt the ice all the way to the bottom. Depending on the location of the lake, many would only partially thaw during the summer. Imagine an ocean with ice caps, once formed, would also sink. Eventually in that area, the ocean would fill with ice. But, when water freezes it floats, protecting the animals living in the water below. Most liquids become heavier and sink when frozen, but not water. As water cools to 39 F, it contracts, then a strange thing happens from 39 to 32 F, it expands 9% until it freezes. This expansion creates spaces between the molecules causing the ice to float because it is less dense than water. Because of this unique quality, ice that forms on lakes and seas stays near the surface, not sinking and causing destruction of life. Our Creator gave water this unique quality in order that life would be possible on Earth.

...stop and consider God's wonders.

TCCSA's STATEMENT OF BELIEF
 We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.
 We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.
 We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.
 We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.
 Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Want interesting inserts for your church bulletins or for handouts? Creation Moments provides free downloads on their web site, www.creationmoments.org, click on Resources and then Church Bulletins. Lots of good stuff there.
