

## Biologos and the Truth About Genetics

**Monday, November 19, 7:30**, Northwestern College, Totino Fine Arts Building Rm F2128, 3003 N Snelling, Roseville  
Biologos claims to be a organization dedicated to the integration of scientific thought with biblical teaching. Unfortunately, this organization equates science with evolution and actively promotes a theistic evolutionary position in the guise of biblical creation. To achieve this, they draw several erroneous conclusions about genetics and about how mutations effect organisms. They further conclude that genetic evidence proves Adam and Eve are not historical figures, and God did not create unique 'Kinds.' However, rather than supporting the conclusions of Biologos, genetic mechanisms provide a very powerful support for a creation model, including the creation of unique "kinds" and the historical existence of Adam and Eve.

## What is the Shelf Life of a Dinosaur Bone?

**Tuesday, November 20, 7:30**, Northwestern College, Totino Fine Arts Building Rm F2128, 3003 N Snelling, Roseville  
The Creation Research Society has initiated a research program to investigate the presence of tissue in dinosaur fossils. Specifically, we have obtained fossilized vertebrae, ribs, and a nearly complete supraorbital horn from Triceratops. Analysis of this material has revealed visible microstructures that appear to be lamellar bone osteocytes. Our data is consistent with previous reports of intact cells evident in compact bone tissue that has not yet fossilized. Evidence of such soft tissue still remaining in dinosaur fossils dated at 65 - 80 million years directly challenges standard geological time scales. Instead, these specimens are fully consistent with a recent deposition. Dr. Kevin Anderson will present updates on these cutting-edge topics that will keep you informed of the latest research.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered...

...that dinosaurs lived very recently in Cambodia. Tourists may visit Angkor Thom with its great temple monastery of Ta Prohm. Among the ruins of Ta Prohm, near a stone entrance, are carvings in bas-relief depicting various animals – monkeys, water buffalo, snakes, roosters, pigs- and a dinosaur! The carvings show animals that were very familiar to the Khmer people during the twelfth century. That means that only 800 years ago Khmer people saw a living stegosaurus in the Cambodian region! This should not be a surprise for those that believe Scripture, God created land animals on Day 6 (Genesis 1: 24-25) and dinosaurs are land animals. Noah built an Ark and took animals on board, which would have included dinosaurs. After the Flood of 2348 B.C., the animals left the Ark which included dinosaurs and would have filled the earth.

...stop and consider God's wonders. Job 37:14

The Science Fair is coming in February  
In past years we have had our fair at Har Mar Mall but due to the costs required by the mall we are moving to Northwestern College. Students should be researching projects of interest and planning how to make it work. Early planning should greatly improve the results and increase their chance of winning a prize. Encourage your students to start soon. Rules and helps are at [www.tccsa.tc/fair/index](http://www.tccsa.tc/fair/index).

### Coming Up . . .

Dec. No meeting or newsletter, take time for God and family.  
Jan. 15—Jim Orme, How to Tour the Chicago Field Museum.  
Feb. 19—Our scheduled speaker had to withdraw so we are looking for a replacement.

Check for updates at [www.tccsa.tc](http://www.tccsa.tc)

Occasionally we have special announcements that can't wait for the next newsletter. See other side to sign up for emails.

**TCCSA's STATEMENT OF BELIEF**  
We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.  
We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.  
We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.  
We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.  
Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

I want to become a member of **TCCSA** and I subscribe to the Statement of Belief. (Calendar year membership dues are \$20.00. Students do not pay dues.) E-Mail: david-johnson@usfamily.net
