Teaching Our Kids to Think Biblically in a Secular World

Tuesday, Feb. 17, 7:30, Totino Fine Arts Center, Room F2128, Univ. of Northwestern, 3003 N Snelling, Roseville

From a very early age, our children are surrounded by a secular view of the world (including evolution and millions of years) which often leaves them with the impression the Bible is nothing but a bunch of made up stories. Teaching our kids to be confident the Bible is true, test everything through the lens of the Bible and see the big picture of biblical history beginning with creation is critical to helping them stand firm in their Christian faith and be prepared for the challenges they will face when they eventually leave home. In her talk, Shyla Allard will share practical ideas centered on these three themes to help us teach our kids to think biblically. If you are concerned about raising kids with a biblical worldview, you need to attend.

All Meetings are free and open to the public, an offering will be accepted.

TCCSA Annual Report:

In 2014 we averaged just over 118 per meeting which was up from almost 110 in 2013. We had some big-name speakers including Georgia Purdom from AiG and Joe Taylor from Texas but our largest turnout was for Bruce Malone from MI. These programs are available because you provide the resources to make it happen. We have no paid staff at TCCSA so everything goes to provide advertising and the resources to bring these speakers to you. Many of our speakers stay with board members while in town to keep our expenses down. Our book table sells resources with very little markup so you will have the information you need.

Coming up this year we have some exciting speakers lined up with local speakers during the snow months when possible. In March we have TCCSA board member, David Mikkelson, speaking on the Geologic Records and how they line up with the Bible. This young man has extensive experience at dinosaur digs and training under Joe Taylor. Be watching for Dr. Carl Baugh in October and Dr. Randy Guliuzza in November to complete a great year of programs. If you would like to help us grow, we can always use more people involved with planning and advertising. Let us know how you want to help.

Have you considered...

...something faster than a speeding bullet. Able to break aquarium glass with a single punch. A peacock mantis shrimp. In the wild, mantis shrimp eat foods such as clams, snails and crabs with tough outsides. With one knock-out punch, accelerating faster than a 22-caliber bullet, the prey is shattered and the shrimp has a tasty lunch. How can the mantis shrimp's club survive some 50,000 knock-out punches? It's all in the design with three layers. The outer layer rich with minerals; the middle layer is composed of chitin with minerals dispersed while the inner layer has chitin fibers orientated differently. The club is light-weight, stiff, tough, shock-resistant and impact tolerant. When small cracks form in the layers they do not spread because of the differences in orientation and hardness of each layer. Researchers are studying the mantis shrimp's "club" in hopes of copying it to make light-weight body armor. These scientists recognize design and know a good one when they see it. When there is a design there must be a Designer and that is God. <http://creation.com/mantis-shrimp-fist-body-armor> ...stop and consider God's wonders. Job 37:14

K-12 Science Fair, February 14, 2015

There is still time to be included in the science fair but you need to move quickly. Rules and helps at

K-12 Writing Contest ends May 15, 2015

We want to encourage your kids to become science writers for future generations.

Coming Up ...

Mar. 17—David Mikkelson—Do Geologic Records Support the Bible?

Apl. 21—Dr. Clyde Billington, - Khirbet Qeiyafa

May 19—Jay Seegert—Evolution: Probable or Problematic?

Check for updates at www.tccsa.tc

- I want to become a member of TCCSA and I subscribe to the Statement of Belief. (Calendar year membership dues are \$20.00. Students do not pay dues.)
- I want to renew my membership in TCCSA (note dues above).
- Mail newsletter E-mail newsletters and updates
- I want to make a donation to help promote Creation Science.

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.
