## The Scientific Approach to Evolution

Jan. 17, 2017, 7:30 PM, Totino Fine Arts Room F2128, Univ. of Northwestern, 3003 N Snelling

Which would you prefer: scientific evidence that provides high confidence or scientific evidence that only provides low confidence? This lecture will explain the differences and review the levels of confidence in the evidence for evolution. When high-confidence evidence is appropriately prioritized over low-confidence evidence, the result is a profound new view of evolution – one that **they didn't teach you in biology. For more information on this topic, please visit** [www.scientificevolution.com](http://www.scientificevolution.com).

Dr. Rob Stadler is an engineer at Medtronic with over 100 patents to his name.

**Dr. Stadler's book** *The Scientific Approach to Evolution* will be available at this meeting.

All Meetings are free and open to the public, an offering will be accepted.

Have You Considered... Venezuela mountain streams have both colorful and drab male guppies. The population of colored fish goes up or down depending on predation pressures. When predators are few or absent, brightly colored males predominate and female guppies mate with them producing more brightly colored guppies. However, when predators were abundant, the easily-spotted colorful males are eaten so females mate with the drab males producing drab colored young. This is natural selection in action. Natural selection eliminates, it does not create.

Another example: Tibetan snow lotus seeds are prized for Chinese medicine. During the last 50 years, the snow lotus plants have halved in height. Why? Harvesters scouring the slopes believe that the taller plant seeds are more potent, leaving mostly shorter plants to reproduce. The genes for tallness are slowly being removed from the Himalayas.

Evolution is not taking place, just natural selection working with available information. No new information is added! Natural selection can only eliminate, never create! Catchpoole, David. "Isn't it Obvious? Natural selection can eliminate but never create!" *Creation* 39(1) 2017. p. 38-41.

### Fiji Outreach will Change a Nation

Will you help supply an *Inspired Evidence* book to a Fiji student? \$1.00 will buy a book and 100% of your donation goes towards books for a student. You may donate \$1.00/book to Julie Von Vett at a TCCSA meeting or send to—Search for the Truth Ministries, 3275 E. Monroe Rd, Midland, MI 48642. (989) 837-5546. Our country would be vastly improved if this happened in our schools?

### Writing Contest Papers Due May 15

Each year we invite any student to research and compose papers on creation science topics and turn them in for review, judging, and possible prizes. For rules and suggestions please go to <http://tccsa.tc/archives/contest>. Our aim is to encourage kids to develop a desire and talent for researching and writing on the topic of Creation & Science. Our own Julie Von Vett starting writing Have You Considered articles (see above) for our newsletters and now has published two books.

### Coming Up (Lord Willing) . . .

Feb. 21—Brian Lauer, What's Wrong with our Textbooks?  
Mar. 21—Julie Von Vett, Creation Vacations: Utah  
April 18—Bruce Malone, Blind to the Obvious

#### TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
