CREATION BULLETIN

August 2018

Vol. 44, No. 8

Two meetings with Dr. Kevin Anderson, creationresearch.org **Are Dinosaur Proteins Immortal?**

Monday, August 20, 7:30 PM, Totino Bldg. Room F2106, Univ. of Northwestern, 3003 N Snelling

Fragments of several proteins have been extracted from different dinosaur fossils. Evolutionists have proposed various mechanisms to explain how these proteins could survive for millions of years in a buried fossil. However, protein degradation studies contradict the claims that certain conditions could preserve proteins for millions of years. Instead, these proteins are evidence that the dinosaur fossils are only a few thousand years of age.

A Creationist Perspective of Genetics

Tuesday, August 21, 7:30 PM, Totino Bldg. Room F2106, Univ. of Northwestern, 3003 N Snelling

The basic teachings of contemporary evolution were developed long before anything was understood about genetics. Thus, early investigators, such as Darwin, understood little of genetics and inheritance, but contemporary researchers do not have this excuse. As our understanding of genetics increases, the validity of evolution diminishes. What is more, recent discoveries about the nature and function of the human genome strongly contradict several popular evolutionary claims and strongly support a creation model.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered...

The Hmong flood legend?

Have you heard of the ancient Miao or Miaotso (known today as the Hmong) people's Great Flood song? Theirs was an oral tradition with their history being passed down from generation after generation in song. The song begins with the creation of the world, the first man being made from dirt, then all the people became wicked except righteous Nuah (Noah) and his family. They were saved from a worldwide Flood in a boat along with two of each kind of animal, it rained for 40 days with the flood continuing eventually covering all the earth, a dove was sent out, the earth was dry. Later a tower was being built and all spoke one language. Then God caused them not to understand each other and all dispersed. The Hmong left the tower and traveled to China and then eventually to the hills of Thailand, Laos, Vietnam and China. In the song it is revealed they are descendants of Jah-phu or Japheth, the third son of Nuah (Noah).

The Hmong people's heritage shows they once knew the one true God of the Bible, and carried with them Genesis 1-11. Christianity is not just a Western religion. Can you imagine being able to take your genealogy back to Japheth to Noah and then to Adam? What a heritage! This amazing record was recorded before missionaries arrived. Pray that they might find their way back to the one true religion that they sing about.

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
