Creation Vacation: Grand Tetons & Yellowstone

Tuesday March 19, 7:30 PM, **Nazareth Hall Great Room**, Univ. of Northwestern, 3003 N Snelling

Each year millions of people from around the world come to see these national park's beauty and wonder! Secular scientists attribute this to natural process over millions of years. Yet, if we go beyond the beauty we will see these parks show the Genesis Flood and subsequent Ice Age. Come and look with our biblical glasses and give glory to God.

Julie Von Vett, home-school science teacher, author and internationally acclaimed public speaker is back with another vacation talk that you won't want to miss. Julie's books are being distributed in Fiji, the Philippines and Mexico and are available world-wide via Amazon. You can get her books at our meetings cheaper than you can from Amazon and get them autographed too. Her previous vacation talks will be repeated in coming weeks, see the announcement below.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered ...

...How do trees survive a bone chilling winter? Trees are half water, and, in the winter, water expands and freezes. What keeps the tree from bursting like frozen water pipes? Scientists have discovered two important ways trees keep their living cells living. First as the autumn cooling process sets in, the living cells of a tree become more pliable allowing most the water in the cells to move into the spaces between the cells. Secondly, removing of water from within the cell concentrates the sugars inside creating an antifreeze lowering the freezing point. The extra-cellular water is not sweetened and does freeze; however, the ice crystals do not puncture the pliable cell membranes. How does evolution explain how this came about? If it did not work the first time, we would have trees all over the forest with frozen water pipes. If the living cells freeze, they die. God designed the trees to survive and thrive in bone chilling winters. Don't we have a **cool** God! Retrieved 2/6/2019 https://northernwoodlands.org/outside_story/article/trees-survive-winter-cold

Creation Vacation Talks Repeated

Going on vacation? Want to see it through biblical eyes? Check out these free talks given by Julie Von Vett

Creation Vacation: **Utah** Thursday, March 28, 7 pm

Creation Vacation: **Black Hills/ Badlands area**, Friday, March 29, 7 pm

Creation Vacation: **Minnesota**, Thursday, April 4, 7 pm

Living Springs Church, 8001 University Ave, Spring Lake Park 55432 <https://lscwesleyan.com/contact-us/>

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.
