CREATION BULLETIN

April 2022

Vol. 48, No. 4

The Importance of Exploring Creation and Sharing God as our Creator

Tuesday April 19, 2022, 7:30 PM, Univ. of Northwestern, **Totino Fine Arts Room F2106**

God reveals Himself through His Word and His Creation. As the church we usually focus on studying His Word but often miss the opportunity of seeing God through His Creation. *"the heavens declare the glory of God" - Psalm 19:1*

In Romans 1:18-20, His Word tells us we can't help but see Him when studying His creation. There are so many passages that come alive when we understand His creation more - Job was schooled by God using creation, and Jesus walked this earth often using the very creation He made to communicate His message of hope.

"When I look at your heavens, the work of your fingers, the moon, and the stars, which you have set in place, what is man that you are mindful of him, and the son of man that you care for him?" Psalms 8:3-4
Dennis Siler is director of the Living Waters Bible Camp in Westby, WI and plans to be with us in person. The camp is hosting a Creation Conference April 22-24, see more info on our web site.

Updates at www.tccsa.tc All meetings free and open to the public.

Have you considered...

...stromatolites? They help us understand how the pre-Flood world was watered. These ubiquitous fossils of precipitated sediments in mats from blue-green algae are found worldwide. Living stromatolites were thought to only exist in Shark's Bay Australia but they have since been found in an upland bog and lowlands in unusual water chemistry and surface springs. Scientists decided to plot the location of fossil stromatolites on the pre-Flood world. The result, they were found to be in highlands, lowlands and shallow seas, the same areas as today. The abundance of stromatolite fossils confirmed that the pre-Flood world had many springs. Genesis 2 speaks of how "a mist went up from the earth and watered the whole face of the ground". The abundance of these fossils on every continent and in every type of environment shows us the world had abundant springs which would have watered the pre-Flood world. Who would have thought that fossil stromatolites confirm the pre-Flood watering system as written in Genesis! God's word is always true!

Clarey, Timothy, Carved in Stone, Institute of Creation Research, Dallas, Texas. 2020, p.409-416.

If you have email we include the information on this newsletter plus links to interesting sites online and updates if things change after this is mailed. We also send a reminder prior to the meeting date with updates and the link to watch and interact with the speaker on Zoom.

If you don't have internet access we provide most of our meetings on DVD so you can watch them anytime. You can purchase DVDs at meetings or from David Johnson, 6300 Georgia Ave N, Brooklyn Park, MN 55428. You can also leave a message at (763) 533-2344 and I will get back to you.

Coming Up (Lord Willing)

May 17— Bryan Nickel - Origin of Limestone
Jun. 21— Brian Young— Rethinking Adam
July 19— Jay Seeger - The Myth of Settled Science
Aug. 16— TBD

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

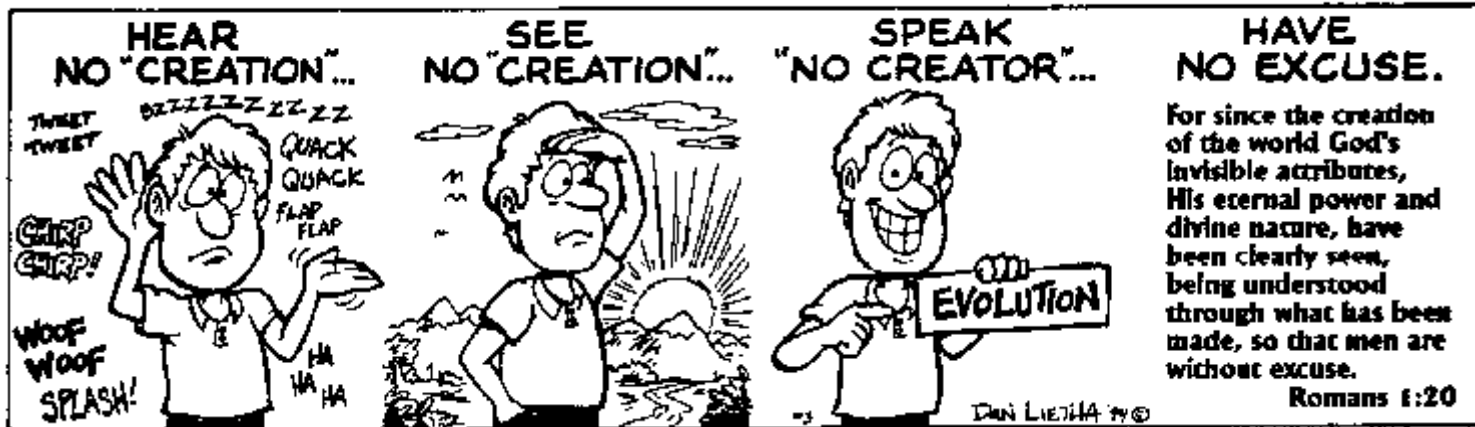

The Twin Cities Creation Science Association was founded in 1973 and has been meeting monthly for almost of 49 years. We don't meet in December and for many years skipped August too. The cartoons are by Dan Lietha who lived in Brooklyn Park until he went to work for Answers in Genesis several years ago. Dan Nuckols also contributed several cartoons to our newsletter over the years, he is now producing Christian movies.

Julie Von Vett home-schooled her two kids and coordinated a science fair for several years, she now teaches science to home-school coops all over the metro and beyond. Julie also writes the *'Have You Considered'* articles in this newsletter. That start connected her to Bruce Malone's ministry *'Search for the Truth'* and now she has coauthored 3 devotional books. Those books should be in every Christian home, they can be life-changing by reading just one page a day for a year. They are now changing lives in several countries.

Prior to Covid we averaged a bit over 100 people attending our meetings each month, we are increasing our average and the past few months we are in the 70s on average and climbing. In addition we have people catching it on Zoom from their homes around the country and with it on YouTube after the meeting we have people watching from anywhere in the world.

Our little organization is now making an impact around the world. To God be the glory, great things He is doing.
