ASTRONOMY AND CREATION: AN INTRODUCTION
by Dr. Donald B. DeYoung
The heavens declare the clear message of creation. The vast distances and numberless stars of deep space are simply beyond our comprehension. Among all the sciences, surely astronomy is the best teacher of humility! This book considers five particular areas: origins, order, structure, time scale, and change. The reader will find this treatment of "outer space" to be a refreshing alternative to most of today’s scientific thinking.
Soft cover 59 pages
Catalog #GW116 Price $5.00

THE HUMAN BODY: AN INTELLIGENT DESIGN
by Alan L. Gillen, Frank J. Sherwin and Alan C. Knowles
This book presents a distinctive creationist approach to human physiology. It challenges the reader to evaluate whether the creation or evolution model makes more sense. It will develop an appreciation of the Creator’s design principles and plan for the human body.
Soft cover 170 pages
Catalog #GW118 Price $16.00

PHYSICAL SCIENCE AND CREATION: AN INTRODUCTION
by Dr. Donald B. DeYoung
Illustrates the integration of physical science and creation. DeYoung presents not only the classical subject matter of physical science, but also he touches briefly on more modern topics such as radiometric dating, quantum theory, the uncertainty principle, and relativity.
Soft cover 81 pages
Catalog #GW120 Price $5.00

THERMODYNAMICS AND THE DEVELOPMENT OF ORDER
by Dr. Emmett L. Williams
This volume is a definitive creationist presentation of thermodynamics in relation to the creation-evolution controversy. Other topics covered are development and stability of order, thermodynamics and evolution, fluctuations as a mechanism of ordering living systems, DNA and RNA formation, and theological implications of the laws of thermodynamics.
Soft cover 142 pages
Catalog #GW122 Price $9.00

BIOLOGY AND CREATION: AN INTRODUCTION REGARDING LIFE AND ITS ORIGINS
by Dr. Wayne Frair
This book contains a discussion of the origin of life, of cells, and of multicellular organisms. Comparisons are made between atheistic and theistic concepts including the intelligent design bridge. Laws of chemistry, physics and probability demand acceptance of the creation of all living organisms by a supernatural Creator.
Soft cover 86 pages
Catalog #GW117 Price $6.00

NATURAL HISTORY IN THE CHRISTIAN WORLDVIEW
by John K. Reed
This book emphasizes the necessity of the Bible as a foundation, a framework, as well as an infallible record of true natural history. The hypocrisy of naturalistic evolution and uniformitarianism are attacked from the inside out!
Soft cover 103 pages
Catalog #GW119 Price $14.50

SCIENCE AND CREATION: AN INTRODUCTION TO SOME TOUGH ISSUES
by Wayne Frair
This book presents some vital issues in science, theology, faith and creation from both historic and twenty-first-century perspectives. The text is designed for those in early stages of scientific studies and for others with a somewhat stronger scientific training lacking in theological perspectives.
Soft cover 80 pages
Catalog #GW121 Price $6.00

"VESTIGIAL ORGANS" ARE FULLY FUNCTIONAL
by Dr. Jerry Bergman and Dr. George Howe
Coccyx - tonsils - appendix - oecum - goose bumps - etc. Evolutionists still assert that many structures in the bodies of animals and people are useless remnants, i.e., "vestiges," of organs which functioned only in evolutionary ancestors. Bergman and Howe have produced a review of those arguments and a reply in which they show that these supposed "remnants of evolution" play important roles and should not be considered as useless vestiges. This book is a must for medical doctors and students who have been exposed to the vestigial organ argument in support of evolution.

**About the Books:***

- **Body by Design** is an anatomy book by Christian and creationist standards, designed for high school through adult students.
- **Darwin's Demise** is a hard-hitting book that presents evidence for creation in an entertaining format for young adults.
- **Exploring The World of Chemistry** is the third book in the Exploring series, designed for elementary students with a solid foundation for understanding the purposes of chemistry with no evolutionary underlay.
- **Dinosaurs by Design** is a dinosaur encyclopedia that groups dinosaurs, describes their habits, and maps their locations.
- **Life in the Great Ice Age** explores the Ice Age and life during that time, focusing on the habits and structures comprising each system.
- **One Blood** challenges the concept of races by discussing various races and their origins.
**SEARCH FOR THE TRUTH**
by Bruce A. Malone
Examines many scientifically related topics as it looks at exactly what science tells us about where we came from. The easy to understand and illustrated articles cover every aspect of the creation/evolution controversy. All of the material in this book is available for copying and distribution to others. This is a tool which can be used to return our culture to its Christian foundation. This is a FANTASTIC book!!!!!!

**An Educator’s Guide to Science on a Budget**
by Gregg Thompson
This is a storehouse of information on the household names of chemicals, how to make chemicals that cannot be purchased, and how to acquire or supplement the stuff of a science lab. The money that can be saved by using this approach instead of those ordered from a science supplier is unbelievable. Gregg strives to offer this information to make it possible for the homeschool parent or private school to give each student a complete science education and a thorough science lab experience.

**GENESIS - Vol I of Commentaries on the Pentateuch**
by Rousas John Rushdoony
Genesis begins the Bible, and is foundational to it. In recent years, it has become commonplace for both humanists and churchmen to sneer at anyone who takes Genesis 1-11 as historical. The entire book of Genesis is basic to Biblical theology. The Church needs to re-study it to recognize its centrality. Marvelous resource!

**A CLOSER LOOK AT THE EVIDENCE**
by Richard & Tina Kleiss
Is there Evidence for God? Why not take a Closer look . . . this amazing book offers awesome proof, primarily scientific, for the existence of a Creator. Arranged in an enjoyable daily devotion-al format, each day provides yet another reason to trust God’s Word. It is organized into 26 different subject areas and draws from over 50 expert sources. Every college student marching off to secular post-secondary education should include this book with daily Bible reading.

**The Long War Against God**
by Dr. Henry Morris
It is generally assumed that evolution originated with Charles Darwin, the one-time-divinity-student-turned-naturalist atheist. That this view is false is almost as shocking as the scholarship of this classic work by leading creationist Henry Morris. He explains in riveting detail the very old plan to undermine God’s Word. Millions of Christians have seen their faith diminished and left fragile by the aggressive arguments for evolution, but few have grasped the whole sorry tale of evolution and its belief system that seeks to eliminate God.

A Scientist Looks At Creation

Explores the testimony of scientist Dr. Robert Gange who writes: "The awesome splendor of a universe so precisely balanced that a butterfly can stay perched at the edge of a flower petal points not to chance, but to cause; not to matter, but to maker; and more than that, to a Maker who matters." Dr. Gange is a research scientist, engineer, and professor. Educated in five universities, he has made pioneering contributions and holds over thirty base patents and has been honored repeatedly by NASA.

**Spinosaurus Tooth**
A “Lizard-hipped” dinosaur as large as a T-rex. From western Africa (Egypt and Niger). He was 39 feet long and weighed 2-3 tons. Spinosaurus had a “sail” on its back of skin-covered spines. The sail was over 6 feet long and projected upward from the backbone. The teeth of the Spinosaurus did not have serrations like a T-rex, but were straight and grooved like a salamander.

Catalog #GW152  Price $3.00/each

**Phytosaur Tooth**
There were giant phytosaurs in swamps. Some with heads as long as 8 feet. Phytosaurs are crocodiles. Several types of phytosaurs not only had skeletons as complex as mammals, but had serrated teeth like a T-rex which were constantly replaced. They were covered with a layer of bony plates. Most phytosaurs had long, thin snouts, and instead of nostrils on the end of their nose, theirs were between their eyes.

Catalog #GW153  Price $3.00/each

**T-Rex Tooth Tip**
From a dinosaur dig in 1995 in Northeast Wyoming at the Hell Creek formation. This tip was excavated from the ribs of a hadrosaur by the Kline/Helfinstein crew.

The True Story of Noah’s Ark
by Tom Dooley
A dramatic and exciting retelling of the timeless Biblical account of Noah’s Ark. The images of the interior of Noah’s Ark are like nothing you’ve ever seen before. The people and cities depicted here are certainly more advanced than what you’ve been led to believe - these people weren’t cave men! They invented metals and musical instruments; they were skilled craftsmen; they built grand cities - all BEFORE the Flood. And this is more advanced than you’ve ever seen.

Biblical Creationism
by Dr. Henry Morris
Respected scholar Henry Morris has spent six decades studying God’s Word. Critics of the doctrine of creation often attempt to marginalize the great truths of God’s creative acts. The reality, however, is that creation is mentioned in each of the Bible’s 66 books. This is one of the great ignored truths of the modern Church. Biblical Creationism is a devastating response to the Bible’s critics.

The Beginning of the World
by Dr. Henry Morris
While many Christians are compromising the Scriptures with what they think is modern science, God is calling many scientists to defend the faith. The result is a sudden surge of awareness that the Bible is true after all. In this book, both scientific and historical aspects of doctrines such as a literal six-day creation, a young earth, and a worldwide cataclysmic flood in the days of Noah, are discussed at length.

The Great Evolution Curriculum Hoax

by Randall Hedtke

Contrary to popular belief, the typical secondary school evolution curriculum does not represent legitimate science. In fact, the curriculum is so far removed from the principles of scientific inquiry that one can make the case that students are being intellectually deceived and that curriculum writers are abusing the trust that students’ place in them. This book is for those who desire to be armed for the intense, yet hidden, science versus religion conflict that persists in our schools.

Imagine that you are the child of the famous painter, Michelangelo. You grew up watching your father paint the ceiling of the Sistine Chapel. Each stroke of the brush revealed his love, creative genius, and masterful perfection.

Years later, as you’re walking beneath your father’s great work, a guide enters leading a group of tourists. As they stand in awe under the grandeur of the artistic work on the Sistine Chapel’s ceiling, you overhear the tour guide state quite boldly that “as amazing as it may sound, the works on the ceiling occurred quite simply by the naturalistic process over countless years of water leaking through the roof and staining the plaster beneath with what now appear as intentional works of beautifully designed art . . . but, mind you, this was strictly a chance occurrence.”

Now would you not, as Michelangelo’s child, rise up in righteous indignation to hear such a flagrant lie being told as the explanation for the work of your father?! Would you not confront the tour guide with the truth and contend for the honor of your father’s name? The modern “tour guides” in “science” - evolutionist’s - are giving as the explanation for the existence of all things (from sea horses to orchids, giraffes to hummingbirds, emeralds to bowhead whales, and pandas to people) that all this purpose, eloquent design, and astronomical complexity just happened by chance by naturalistic processes over billions of years. Is it at all surprising then, that Christians should more boldly and forthrightly contend for the honor of their Heavenly Father and rise up against this affront to our Creator?!

The authoritative and divinely inspired Biblical Word such as in Exodus 20:11 “For in six days the Lord made the heavens and the earth, the sea, and all that is in them,” is the only reliable and trustworthy fact for explaining the origin of all things.

We must champion the truth about our Lord Jesus Christ as our Creator and Redeemer and stand courageously against the philosophy of evolution. The tremendous resources in this catalog will equip you and many to understand the nature of the creation vs. evolution battle for the truth. May you avail yourself of many of these great works.
