Details at: www.stlucascc.org

Book Release: Inspired Evidence: Only One Reality.

Both authors will make presentation. 432 page daily devotional based on the Bible and science.

New Data

Understand the science behind millions of years and thousands of years and see what the real time-line is.

Often one encounters very bright people, very skilled in their area of expertise, who make comments on subjects outside of their area of expertise based on one side of the Science/Bible issue. Other people then read these writings recognize the author's skill in his expertise and assume that he has applied the same diligence of study to all of his areas of comments. As a result, they no longer see the other side of the issue as plausible and they politely listen, but no longer hear.

Answers: Choose from 44 topics of typical questions people ask about Creation and Science – Do you have the answers? Bruce Malone

Closing – 5:50-6:00 p.m.

Pastor Dan Peterson

Bruce Malone is a retired Dow Chemical researcher (17 patents – including materials used on the Space Station). He is an internationally known speaker and Executive Director of Search for the Truth Ministries. His latest book is co-authored: *Inspired Evidence: Only One Reality*

Julie Von Vett has been a full time science teacher for homeschool co-ops, teaching creation science for the past seven years. She is also a freelance speaker on worldviews and creation science. She is co-author of *Inspired Evidence: Only One Reality*

Chuck Morris became a Christian in his early teens and struggled with evolution, scripture, and history during his teens and early 20s. After earning a BSEE at Georgia Tech, he moved to MN where he spent most of his career in computer design and architecture. Shortly after moving to MN, he attended a night school class which began the process of opening his eyes to how science supports scripture rather than being in conflict with it. The subject of origins has been somewhere between a hobby and a passion ever since.

Don Slinger is a retired Conservation Officer for the state of Minnesota (33 years). His field and management work included enforcement and education. Since retiring, Don has taught at homeschool co-ops and volunteers with several non-profit organizations.
