1. Creation - Evolution: What difference does it make whether I believe in creation or evolution? Is a day in the Bible really a 24 hour day? This talk will examine both evolution and creation science in a fun and lively way. What it is, the scientific evidence behind it and how it affects our lives.

2. The Lost World: What was the pre-Flood (before the flood of Noah's time) world like? This world existed for 1,656 years yet in Genesis it is written from chapter one to eight. How long did people live? Did the world have a uniform temperature? Where there giants on the earth? And what does the fossil evidence show?

3. Noah's Ark: Was it even possible? Would the boat even float? How many animals were there on the Ark? How did Noah and his family take care of the animals for one year and seven days? Have there been sighting of the Ark?

4. Dinosaurs: Did dinosaurs and man live together? Are dinosaurs mentioned in the Bible? What happened to the dinosaurs?

5. Where did the Races come from? Why are you the color you are? Did we all come from Adam and Eve? How does the Tower of Babel fit with the color of your skin? Have they found the missing links from ape to man?

6. The Ice Age and Mammoths: When did the Ice Age happen? What caused the ice age? How many were there? What happened to the mammoths?

7. Science and the Bible: The Bible is not a science book but, it contains amazingly accurate scientific information. Come and hear what God revealed to us thousands of years before science "proved" it.

8. Animals by Design: As parents we proudly display our child's artwork on our refrigerator door. Nature is God's art work; His refrigerator door is much larger than ours! Come and encounter God through seeing the designs in His creatures.

Each creation presentation is one hour in length and designed for families.
