

# Science and Creation: Do they mix?

April 5, 6, 7, 2018

University of Minnesota  
East Bank

Does  
Natural Selection  
Create New  
Information?

4/5 Thur. 5:15PM – Molecular & Cellular Biol Rm 3-120

## “Natural Selection and Creation”

A review of what Natural Selection is all about - including the claims surrounding drug resistant bacteria and more. This results in knowing the differences between Natural Selection & Darwinism.

4/6 Friday 5:15PM – Bruininks Hall room 220

## “Big Bang Theory! ... In Big Trouble!”

Big Bang theory dominates most of cosmology today. But does it really explain “Everything from Nothing”? What do some modern discoveries say about this? Is it just a sitcom?

4/7 Saturday 7PM – Worship Meeting

315 10<sup>th</sup> Ave SE / Minneapolis

## “People of Science ... People of God”

Most of the fields of modern science were developed and expanded by scientists who were/are also creationists. Come hear this encouraging review of people who love science and the Bible both.

(Bring your questions!)

**Speaker: Helmut Welke, MS** is a recently retired engineering manager for a Fortune 200 company. He holds BS & MS degrees from the University of Illinois (Urbana) and was named a ‘Fellow’ by his engineering society. He is a certified engineering manager and has held engineering assignments in several locations in the US and in Europe.

He is also the founder and president of the Quad-City Creation Science Association, a member of the Creation Research Society and a speaker for Logos Research Associates.

Sponsored by Maranatha Christian Fellowship & International Student Outreach.
