This month's meeting features practical advice on how to navigate a secular museum with a Biblical creationist worldview. In doing this, Shyla Allard will use a visual tour of the Chicago Field Museum of Natural History and its "Evolving Planet" exhibit as an example. It is here she has led guided tours for students, helping them to look critically at the "evidence," and understand what is scientific

fact and what is scientific "opinion" based on evolutionary assumptions. She will even share a handbook she has written for a walk through the museum exhibit. You will leave this meeting better equipped to experience secular museums through the lens of the Bible.

We hope to schedule a tour of our local science museum with her -- stay tuned.
