A compilation of commonly known scientific evidence supporting creation—evidence in the fields of geology, biology, medicine, paleontology, chemistry, biochemistry, physics, astrophysics, and astronomy, and specific research by esteemed scientists, and from my own personal experience as a consulting geologist and biologist. This talk and website were completed after having grown weary of false evolutionary doctrine promoted by public television, national networks and other media, and taught in our public schools. Although evolutionary theory" does not meet the universally accepted definition of 'theory' or hypothesis' or, for that matter, the universally accepted definition of 'science', students continue to be taught evolution as "proven fact"—and later in life, they perpetuate this doctrine as teachers, journalists, and parents without question.
