# "You've Come a Long Way Baby"

University of Northwestern - St. Paul, 3003 North Snelling, Roseville, MN,  
Totino Fine Arts Center, Room F2128 (Old F116)

You've Come a Long Way, Baby! - The Transition from Prenatal to Postnatal Circulation. This fascinating presentation discusses the physical changes that must occur in the circulatory system for a baby to make the transition from life in the womb to the outside world. Many of the contributing factors that stimulate these changes are also given, demonstrating the irreducible complexity of the mammalian system of giving birth. A medical case history is presented with a surprise ending, and the relevance of all of this to Genesis is demonstrated.

**Assistant Professor of Biology at Arizona Christian University, Research Associate, B.A. (Russian), M.D. University of Arizona** Joseph earned his medical degree at the College of Medicine at the University of Arizona and is currently an assistant biology professor at Arizona Christian University. Some of the courses he has taught over the years include Biology, Anatomy and Physiology, Cell and Molecular Biology, Microbiology, Human Genetics, and Ecology. Not only is he well versed in the sciences, Joseph is fluent in Spanish and Russian.

Having heard the clear call of God on his life to teach from the Biblical creation perspective, Joseph has been active in researching and speaking since 1993. In 2005 he began teaching annually at the Arizona Origin Science Association. Joseph is also a founding staff member of [Creation Training Initiative](http://www.tccsa.tc).
