"Amber and Honey"

**University of Northwestern St Paul, 3003 Snelling Ave. N. Roseville MN
Totino Fine Arts Center FAC 2106**

Discusses the formation of amber during Noah's Flood, special properties of honey, and unique behaviors and anatomy of honeybees involved with honey production. Amber formation and distribution can only be explained by a global flood. You will be amazed to learn the intricate details of how God put together the honeybee and the constituents in honey.
