“What’s Wrong with our Textbooks”

University of Northwestern - St. Paul, 3003 North Snelling, Roseville, MN,
Totino Fine Arts Center, Room F2128 (Old F116) www.tccsa.tc

How does evolution have such a stronghold in our culture? Let's take a critical look at our textbooks to see what is being misinterpreted, misrepresented, and censored.

For example, why aren't students told that Lucy's hip looked just like a chimp hip until Dr. Lovejoy cut it and twisted it to make it look human? Why are students told Lucy's skeleton is "nearly complete" when it has less than 60 bone fragments? Why aren't students told dinosaur blood cells and bone cells have been found in dinosaur bones? As taxpayers, we should be concerned how our money is being spent to shape the next generation.
