## "The Red Sea Miracle II"

U of Northwestern St Paul, 3003 Snelling Ave. N. Roseville MN Totino F2106

The crossing of the Red Sea is one of the greatest miracles of the Bible. But how big was it really? Today, widely different ideas are proposed for the location and scale of the journey out of Egypt and across the sea. This debate brings up questions such as how far and fast were the Israelites capable of traveling, does the biblical text really describe a mighty sea being split, and what kind of miracles would be required at the various sites proposed? Is the standard view ignoring important biblical information about God's involvement? A patterns approach points to a biblical miracle that was awesome beyond imagination.
