## **“Pluto – The Undiscovered Country”**

University of Northwestern St Paul, 3003 Snelling  
Ave. N. Roseville MN  
Totino Fine Arts Center FAC 2106

In 1930 Pluto was discovered by amateur astronomer Clyde Tombaugh. 85 years after the discovery of Pluto, with the Horizon fly by July 14, 2015, we now know what it looks like. Much of the “evolutionary speculation” for 85 years has been proven to be false. I will give 10 undiscovered anomalies that show Pluto could not “evolve” over billions of years but was made by God in a moment of time.

The data sent back to earth from the New Horizon probe has been interpreted by scientists only from an evolutionary world view. The “Undiscovered Country” means that much about Pluto is undiscovered because of their bias. Much of the Undiscovered Country is data that shows “God Did It.”

Other Undiscovered countries of our Solar System.

These are called by scientist “anomalies.” When this word is used and we read between the lines it means: “It does not fit evolutionary theories.” I call these theories stories as they are not science based on math formulas.
