As you explore the world around you, do you have questions about the rock layers you see at Wisconsin Dells, the Badlands, or the Grand Canyon? Where did all the sediments come from? Why are fossilized dinosaur bones buried in the ground? How are fossils formed? Was there a global flood? Do we have any proof? What can we learn from Mt. St. Helens and erosion? If you struggle with any of these stumpers, please come and join us for, "Geological Records: Do They Support the Bible?"
