Butterflies and Moths

University of Northwestern St Paul, 3003 Snelling Ave. N. Roseville MN Totino Fine Arts, Room 2106

Have you ever thought about how the life cycle of butterflies and moths with its metamorphosis refutes evolution? What's the difference between a cocoon and a chrysalis? A Blue Morpho is not blue, so where does it get its color? How are the eyes of a moth being used to better computers? These and other questions will be answered as we examine the wonderful world of butterflies and moths.
