We will look at people and events throughout the Old Testament and show you archaeological evidences today that substantiate the Biblical accounts. In addition, there will be a number of scientific demonstrations that illustrate the truth of God's Word and reveal His power and authority in His creation.

Some things we will discuss follow:

Did you know the Bible speaks of a 6 fingered/toed Philistine man and in archaeology they have found a figure of a six fingered/toed man in the same area?

How does the dating used in archaeology give us dates of 9000 years etc. if the earth is only around 6000 years old?

How could God speak things into existence? Is there any scientific support that this could happen?
