"Astronomy and Mars: A Creation Perspective"

University of Northwestern - St. Paul, 3003 North Snelling,
Roseville, MN, Nazareth Hall Chapel, www.tccsa.tc

The heavens declare the glory of God yet there seems to be a lot of confusion within the secular world. How are we to understand the purpose of the stars? Is what we are being taught about vast distances and star formation even true? Does astronomy really show an old universe? How did the water evidence on Mars get there? Is there life on Mars? Should we really be sending people to colonize Mars? Will it work? These and more questions will be answered as we take a look at the Biblical perspective of science and astronomy.
