

CREATION BULLETIN

January 2015

Vol. 41, No. 1

Incredible Creatures

Tuesday, Jan.. 20, 7:30, Totino Fine Arts Center, Room F2128 , Univ. of Northwestern, 3003 N Snelling, Roseville

We are constantly being told in newspaper and TV programs that this or that creature has "evolved". Do we ever stop to ask "How could it?" What about the monarch, giraffe, painted turtle and arctic cod? Learn about these amazing creatures and others that testify to a powerful and wise Creator-God who designed them.

Julie Von Vett—wife, mother, teacher and author will amaze us with little-known information about God's creations, the creatures we may see around us but really don't know much about. Have you enjoyed the **Have you considered...** articles for the past 9 years? Thank Julie. Have you got a copy of the book **Inspired Evidence?** Thank Julie. This program will inspire everyone.

All Meetings are free and open to the public, an offering will be accepted.

Have you considered...

...The Squirrel's tail, consider just a few of the uses for the tail of a squirrel.

1. How does a squirrel stay balanced on a tree branch? He uses his tail like a tight rope walker uses a pole. Tilting his tail one way or the other as its center of gravity changes allows it to move along the branch.
2. When a squirrel is eating note how he curls the tail over his head. If a hawk decides to have him for lunch, all its claws will grab is a fluffy tail.
3. Or notice the tail when he sleep, He wraps it around his body. He carries his own portable sleeping bag.

Did this tail happen by chance or did the Creator design it that way. If the tail were not there, the squirrel would lack balance, would not have protection from flying predators, and would not easily withstand cold temperatures. So the next time you see a squirrel, stop and consider his tail.

...stop and consider God's wonders. Job 37:14

Science Fair, February 14, 2015

Students should be researching projects of interest and planning how to make it work. Early planning should greatly improve the results and increase their chance of winning a prize. Encourage your students to start soon. Rules and helps at <http://tccsa.tc/fair/index>.

Writing Contest ends May 15, 2015

We also offer a contest for K-12 writers. We want to encourage your kids to become science writers for future generations. Many remember when creation resources were hard to find, let's not have that happen again. <http://tccsa.tc/archives/contest/index>

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.
