January 2023

Vol. 49, No. 1

Creation / Evolution

Tuesday January 17, 2023, 7:30 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

Creation - Evolution: What difference does it make whether I believe in creation or evolution? Is a day in the Bible really a 24-hour day? This talk will examine both evolution and creation science in a fun and lively way. What it is, the scientific evidence behind it and how it affects our lives.

Julie Von Vett teaches creation science to homeschoolers in the Twin Cities area, has written three devotional creation science books and authors the *Have You Considered* articles in our newsletters. Julie has taught creation science in the island nations of Fiji and Vanuatu. She is a popular speaker at TCCSA meetings and is available to speak in area churches, schools and other locations. She speaks at a level that almost anyone who understands English will enjoy.

Updates at www.tccsa.tc All meetings free and open to the public.

Have you considered...

... the appendix. Have you had your appendix out? In the past, scientists thought that the appendix was a useless organ and therefore was no longer needed. However, scientists published in 2009 that that the appendix is in fact very useful. Researchers at Duke University Medical Center found that the appendix "is a safe haven where good bacteria could hang out until they were needed to repopulate the gut after a nasty case of diarrhea". You could say that your appendix "reboots" the good bacteria into your intestines. What we thought was useless junk, God designed for our benefit.

How many people had their appendix removed needlessly because doctors thought they served no good purpose? How many suffered from surgery to have their tonsils removed because they would swell and hurt when their body was fighting a cold? The book *Cheaper by the Dozen* tells of the whole family getting their tonsils removed because that was what the doctor said they should do.

People throughout the ages have suffered at the hands of "experts" because scientists say science proves what is best for them. We still see it today with global cooling (1960s & 70s) warming (80s & 90s) and now climate change. We see it in Geology, Astronomy, Oceanography, Medicine, History and you-name-it, nothing is settled science anymore. Biology seems to be the current science that has to be re-made in mans imagination, not God's.

The Bible has the answers or it will point us to the answers if we look. Real answers have been, and are, found by Bible believing scientists and explorers who follow God's Word.

...stop and consider God's wonders. Job 37:14

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Welcome to 2023

Thanks to all the faithful members and friends of TCCSA for another good year of informative meetings, your attendance and giving make it all possible. Because of the lockdowns the last two years we had to use the internet for most of our meetings then. This year we have provided several in-person speakers but still use the internet for some who are unable to travel. Everyone can still attend the meeting at Northwestern to view our speaker on the big screen. Meetings with live speakers are now well attended like before Covid from 99 to 145 the last 3 meetings. All meetings are recorded and most are on the internet for viewing by anyone in the world. Some have requested copies on DVD so we will have them available at our upcoming meetings.

Most of the dates this year have been booked but some later in the year are still being worked on. Page one lists through April but we have Bryan Young in May, Glenn Collins in June and Spike Psarris in August so far.

It is our privilege to serve as your board of directors for TCCSA for another year and look forward to seeing you in person or via ZOOM each month in the coming year. If you have suggestions for speakers or some way we can do something better, please let us know via email or at a meeting. We want to make our meetings the best they can be for everyone in attendance and on line to give God the glory and honor He deserves. Keep prayed up and ready to meet Jesus some day, maybe soon! Alan, Brian, Byron, Dave, Emily, Julie, Neil and Ross
