

Mute Fossils Speak Volumes

Tuesday October 17, 2023, 7:00 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

What do the fossils really say? Nothing. Dead things don't talk. However scientists try to talk for them based on their interpretation of the evidence. We will look at what was reported, what was actually found, the role of the artist in the fossil reconstructions, out-of-order fossils and soft tissue in fossils. All said, the fossils speak volumes against evolution and volumes for creation.

Dave and Mary Jo Nutting are not strangers to TCCSA or to Minnesota public colleges. They speak just about every year at the U of M in the Twin Cities, Mankato and other schools. They founded and continue to operate Alpha Omega Institute in Grand Junction, CO. They produce *Think Believe* newsletter that you can sign up for at the meeting. They are always interesting and informative and are able to communicate to just about everyone.

Updates at www.tccsa.tc All meetings free and open to the public.

Have you considered ...

... **Deep Sea Coal? Recently scientists have discovered enormous** coalbeds off the coast of Asia. These vast coal beds are located far out to sea, some even beneath 3,000 feet of water and thousands of feet of sediment! Evolutionary scientists believe that coal formed in swamps, in this situation the swamp would have been on land and the land had to sink dramatically. There is little evidence for this.

So how would deep sea coal come about? Think Flood of Noah's day. As the waters ran off the continents at the end of the Flood, vast forests would have been ripped up, transported, and buried thus creating the massive coal beds we find offshore today. These deep-sea coal formations testify that the Flood did happen. God's word is true from the very beginning.

Clarey, Tim, 2021. Offshore Cenozoic Coal Confirms N-Q Flood Boundary. *Acts and Facts*. 50(7):7.

Have you ever read the TCCSA statement of Belief on the other side of this page? Do you believe it? A person who has accepted Jesus as their personal Savior is saved but is it required they believe the rest? The last sentence is required for salvation but the others starting at the top should become **obvious as you read and study the Bible and seek God's help in understanding it.**

Coming Up (Lord Willing)

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

This and That

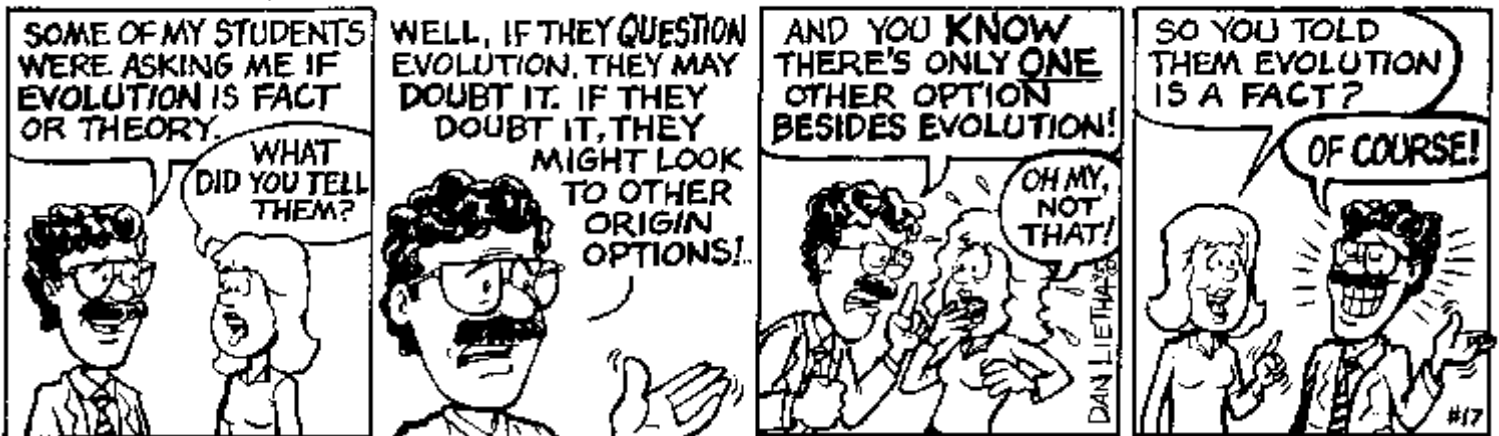

This being our 50th year we have a drawing for books and DVD's at our meetings. All attendees can get a ticket at the book table to participate in the drawing.

We are very grateful to the University of Northwestern for hosting our monthly meetings for decades. A sponsor is needed in order to have our meetings there. Dr. Bruce Simat has been our sponsor for several years.

TCCSA has not been charged in the past but Northwestern is reconsidering their policy and we may have a new relationship starting in January. Occasionally we have donated money to the school as a thank you. They have informed us that they are considering a fee and insurance requirement for outside organizations.

We are filling the meeting speakers list for next year, in January we have David Mikkelson coming. David is from the Twin Cities but now lives in TX. He has been trained by Joe Taylor and others on how to dig, preserve, display and reproduce artifacts, fossils and entire skeletons. We expect an interesting and informative talk about the evidence for the flood.
