Dinosaur Fossils: From Dirt To Display: The Journey of a Dinosaur Bone

Tuesday January 16, 2024, 7:00 PM, Univ. of Northwestern, Totino Fine Arts Center, Room F2106

Have you ever looked at a dinosaur skeleton on display in a museum and wondered how it got there? How do we know where to dig for dinosaur bones? Join us as we explore the journey from finding to displaying a fossil and every precise step along the way.

David Mikkelson has over 15 years of experience excavating and preparing fossils. He is the owner of *Everything Fossil*, which supplies many creation museums around the United States with quality fossils and paleontological services. He lives in Texas with his wife, Sara, and their three-year-old son.

Updates at www.tccsa.tc All meetings free and open to the public.

Have you considered ...

...the beauty of blizzards? They are full of snowflakes. The average complex snowflake is made up of 100 ice crystals. The number of ways these crystals can be arranged is staggering; if you do the math, the number of possibilities is greater than the total atoms in the universe. Thus, it's unlikely that any two complex snow crystals, since the Flood of Noah's time, have ever looked completely alike. God is still giving us new design possibilities today. So, the next time it snows, catch a snowflake on your dark mitten and look close at the new design God has given us.

.... stop and consider God's wonders. Job 37:14

Welcome to 2024

Last year we celebrated 50 years of TCCSA. We thank everyone who attends and/or watches our programs in person or on Zoom/YouTube or Rumble. The past 3 years had some difficult times with shut-downs and travel restrictions. This year we will have more in-person meetings, currently we have 10 speakers scheduled and 9 will be here in person.

This newsletter mostly goes to people who don't have email so they probably don't have access to the internet but be aware we are reaching the world with programs you watch in person. Most of our income comes from offerings collected at our meetings. Thank you for your generosity which makes possible world-class speakers presenting cutting-edge information.

We plan to continue until Jesus returns or He leads in a different direction. Your prayers are an important part of this ministry.

Coming Up (Lord Willing)

Feb. 20—Mike Snavelly—Lost Secrets of Ancient Civilizations

Mar. 19—Steve Law—Location of Mount Sinai

Apl. 16—Jay Seegert—TBD

TCCSA's STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths. We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds. We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect. We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind. Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

Important Business

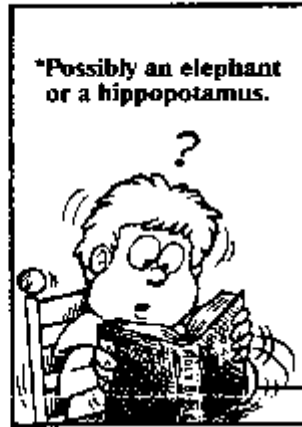

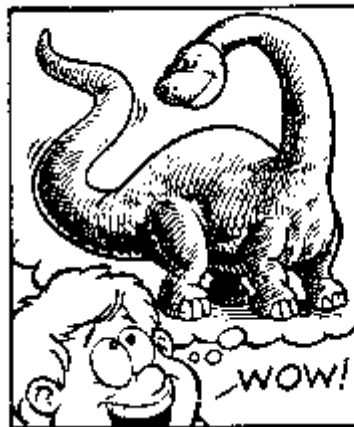

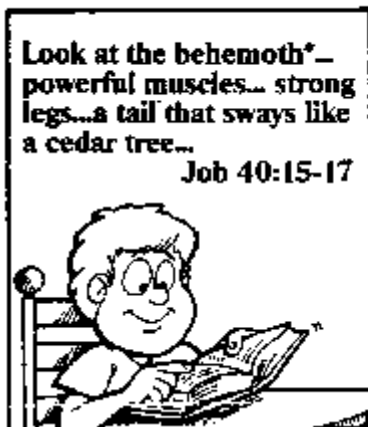

At the January meeting we have our bi-annual election for the TCCSA executives. All paid-up members will be given a ballot for the president, treasurer and secretary positions. Current office holders are listed on page 1 of this newsletter.

In 2023 we averaged 69 people attending our meetings. Most attended in person with the rest on Zoom during the meeting. After the meetings the programs are placed on YouTube and Rumble where anyone at any time from any place can view the programs. Some programs are watched tens of thousands of times but most get hundreds of views in the first year and continue to be watched for years.

We currently have a team of young people working on a redesign of our website. The new layout will be using modern software that will be easier to update for those who keep it up-to-date. We are grateful to those who are volunteering their time and knowledge to make it better.

The University of Northwestern allows us to use their facilities and staff without cost and we are most grateful to them. This allows us to use our limited resources to provide the best speakers we can find.
