

Twin Cities Creation Science Association (TCCSA) is an organization dedicated to spreading the word that scientific evidence points unequivocally to creation and the accuracy of the Biblical timetable. This is contrary to not only the common secular view, but contrary to the assumptions of many Christians that evolution and millions of years has been proven and we must find a way to live with that as Christians. I once believed that way and was astounded by the actual evidence! When it is understood that the geologic record is actually strong evidence for a worldwide flood, the millions of years melt away. Moving water lays down sequential strata as demonstrated at Mount St Helens and quantitative studies can estimate the depth of water and current velocity that laid down the formations seen in the Grand Canyon. It is also clear that there would not be billions of fossils in the rocks if they had been laid down over long ages – the fossilized creatures would have long ago decayed! Recently intact blood cells and blood vessels have been found in fossils dated by secular authorities as hundreds of millions of years old. This is obviously impossible, but the promoters of evolution torture the evidence in an attempt to make it fit their conclusions instead of allowing the data to speak for itself. Indeed, the rocks cry out! The Biblical record claims that death entered the world as a result of sin. If millions of years elapsed before Adam and Eve sinned, then the Bible is discredited. But in reality, the evidence strongly supports the Biblical history. Despite these facts, many Christians and non-Christians believe the myth of evolution and deep time.

Twin Cities Creation Science is a Christian non-profit organization, for which contributions are tax deductible. It produces a monthly program held currently at University of Northwestern St Paul (located in Roseville) and maintains a website and has a variety of recorded programs on its YouTube channel. The website, [www.tccsa.tc](http://www.tccsa.tc) has information on the programs and the resources available. This website has a worldwide reach with visits coming from eastern Europe, including both Ukraine and Russia as well as Asia, including China and India. The TCCSA YouTube channel has records of previous meetings, some with thousands of views. This is repeated on Rumble.

Many youth have attended the meetings of TCCSA and many have had contact with the evidence for creation through the Creation Museum and Ark Encounter in Kentucky.

TCCSA is a low budget volunteer organization dependent on contributions and could benefit greatly if churches could put it on the budget for \$1000 a year.

## TCCSA STATEMENT OF BELIEF

We believe in God: The Father, Son and Holy Spirit. We believe that the Bible is the inspired Word of God, and that all of its assertions are historically and scientifically true in the original autographs; this means that the account of origins in Genesis is a factual presentation of actual historical truths.

We believe that the origin of matter and all basic types of living things, including man, came about through direct creative acts of God during the six-day creation week described in Genesis. Whatever biological changes have occurred since the creation week have accomplished only changes within the created kinds.

We believe that the great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event, world-wide in extent and effect.

We accept the account of the special creation of Adam and Eve as the first man and woman. Their subsequent fall into sin, by disobedience of God's direct command, is the basis for our belief in the necessity of a Savior for all mankind.

Therefore, we believe that Jesus Christ is our Lord and only Savior and that personal faith in Him is necessary for salvation.

---

## TCCSA MISSION STATEMENT

TCCSA exists to present evidence for creation and a young earth in ways that will cause:

1. Christians, especially young people, to be strengthened in their faith, fortified against the attacks on their faith by the evolutionary establishment, and be trained and motivated to intelligently discuss these matters with their peers, teachers and the community at large.
2. Pastors and other church leaders to understand the relevance of creation to the integrity of the gospel and the authority of Scripture.
3. Unbelievers to be confronted with the scientific evidence for creation.
4. People to not only become creationists but to become born again Christians through the confession of their sins and acceptance of the finished work of Jesus Christ on the cross.
