TWIN CITIES CREATION SCIENCE ASSOCIATION

THE YEAR EVOLUTION WAS OVERTURNED

Speaker

DR. CARL WERNER

Tuesday, February 18, 2025 – 7:00 pm

Historians in the future will look back and determine 2024 was the year when the theory of naturalism was overturned. It will likely take decades longer for the scientific community to grasp that the key components of naturalism were overturned by 2024, namely:

- The origin of the universe – The Big Bang;
- The origin of life from chemicals – Abiogenesis;
- The origin of the seven animal groups from a bacteria – The Cambrian Explosion;
- The origins of animal groups within the phyla – “The Trade Secret of Paleontology”;
- The 3 proposed mechanisms of evolution – Natural Selection, Adaptation, and Random Mutations; and
- The three best fossil proofs for the theory of evolution – Whale Evolution, Bird Evolution, and Human Evolution.

In 2024, human evolution – the last viable proof of naturalism – collapsed with the revelation of widespread fraud committed by human evolution scientists. Since scientists tend to get stuck in their scientific beliefs, it will be the community of non-scientists that ushers in this new era of post-naturalism.
